

**TowerSheet brings your operations  
together with intelligence.**

**TowerSheet**

## Well Services Streamlined

Get the most out of your team by eliminating inaccurate paperwork, improving data quality and gaining instant visibility. Improve communication across teams and streamline workflow. Capture data on any device on-the-go even when Internet is offline.

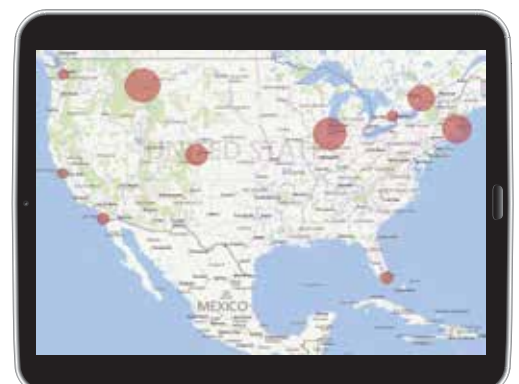

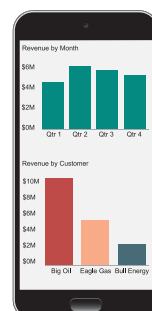

## TowerSheet Analytics

TowerSheet Analytics is a business intelligence technology that consolidates relevant operational data, for the creation of systematic views that support the business strategy, in order to foster critical analysis that is key for effective business management practice.

## Software as a Service

Modernize your business while slashing IT costs. TowerSheet is a Cloud solution ready to scale up and down to meet new demand and save money. The up-front investment is minimum and you only pay for what you effectively use.

# Compare our plans

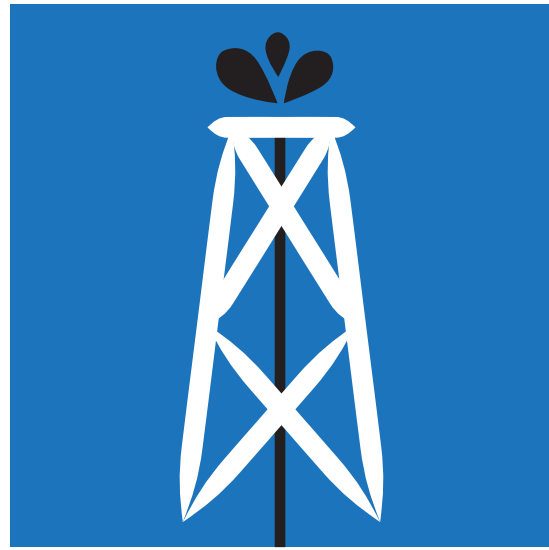

Choose the plan that best suits your needs.

"As a rig manager that prefers to be out at the rig with my team and my equipment, TowerSheet allows me to have valued face time with them. For employees that are not 'tech-savvy' the system is streamlined and very adjustable which I really like, because I prefer not to have anything around that is wasting time, space and money."
