

Inventory management software for growing businesses.

**Run a more
efficient
business.**

Increase sales

Expand your business online with our multi-channel inventory management system. Set up and integrate your Amazon, eBay, Etsy, or Shopify account, and start selling your merchandise.

Manage orders

Manage your offline and online orders with our efficient order management system. Also, you can create purchase orders, backorders and drop shipments, all in a single inventory management application.

End-to-end tracking

Track every item or batch in your inventory with serial number and batch tracking feature. This way, you can either always keep a track on the movement of the items or have better control over the expiry of each batch.

Multiple shipping integrations

Get real-time shipping rates and in-transit details of major shipping carriers and choose a shipping partner for your business, wisely. A much-needed feature for a complete inventory management system.

Accounting and CRM integrations

Our seamless integration with Zoho CRM and Zoho Books automatically syncs all your contacts, orders and help you manage financial data without breaking a sweat.

Warehouse Management

Check stock level, manage inter-warehouse transfer, and generate reports for specific warehouses within seconds. Warehouse inventory management, at your fingertips.

Features

at a

glance

A cloud-based inventory control system

Create sales strategies, manage re-order point, and keep your customers satisfied with Zoho Inventory, a complete inventory control system.

Centralized Inventory.

Create sales strategies, manage re-order point, and keep your customers satisfied with Zoho Inventory, a complete inventory control system.

Product Listing.

Keep your inventory organized with vital details like prices, cost, availability and SKUs. Create variants of an item based on custom attributes and keep them neatly organized.

Item Kitting.

Bundle a group of items together to sell as a single unit. Zoho Inventory updates individual items and components as products are put together and sold.

Automatic Re-ordering.

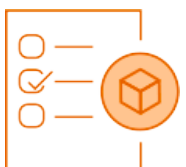

Never lose out on another sale due to stock-outs in any of the channels. Set re-order points, reminders, and preferred vendors for your products to avoid untimely stock-outs.

Serial Number Tracking

Identify each item in your inventory with a code and track its movement from the point of purchase to sale.

Batch and expiry date tracking.

Track different batches of items and monitor their expiry dates so that, you sell them when it is fresh.

Warehouse management made easy

Manage multiple warehouses, transfer stock between them and generate reports to get better insights about warehouse management, with Zoho Inventory.

Multi location warehouse management software

Add multiple warehouses and also control the flow of stock between your store and warehouses, located at different locations with a single application.

Dispatch orders from closest warehouse

Choose the warehouse which is closest to the customer's location while you create a Sales order. This way you can deliver faster, save a lot of time and also cut down the transportation cost.

Track your transfer orders

Select the specific batch or serial number while transferring an item from one warehouse to another. This way, you can keep a track on the movement of each item without any hassles.

Generate accurate reports

Find out the volume of items that are shipped in and out from each of your warehouses. Get more insights into each item's sales and purchase trends, in simple steps.

Multi-channel selling

Manage, control and measure multi-channel selling with the help of a single inventory management application.

Multiple Currencies.

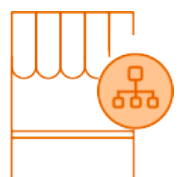

Buy and sell in multiple currencies and have them converted to your base currency. Pas de Probleme!

Get paid faster.

Get paid online with the array of payment gateways available in Zoho Inventory. Never worry about delayed checks again.

Measure channel performance.

Get insights into how well a selling channel performs and you can make better decisions about where to spend your time and money.

Plan and track every process efficiently

Manage sales and purchase orders, create packages, and send delivery updates from a single order management system.

Centralized system for multi-channel sales

Centralized system for multi-channel sales Integrate with Amazon.com, eBay, Etsy, and Shopify and manage all online orders in a single platform. Also, set re-order point and get updates on the stock level to avoid out-of-stock situation, all from one central order management system.

Easy packaging and shipping

Create packages, print package slips and get real-time shipping rates for 30 different shipping services. You can do all of this and more from a single order management software.

Track shipments

Monitor the movement of packages post-shipment and keep your customers updated with the location. Use this tactic to create more satisfied customers with this order management application.

Payment integration

Set up and integrate your payment account to start receiving online payments right away. Switch to an easy, secure and convenient mode of accepting payment from your customers.

Accurate reports

Identify your most profitable item, monitor purchase and sales order trend, to make informed decisions and stay ahead of your competitors.

An up-to-the-mark order fulfillment solution

Set up an order fulfillment system for your business with Zoho Inventory. It helps you to simplify work flow, fulfill orders faster, and gain customer trust.

Common dashboard

Get a quick overview of all your sales orders in a single dashboard. See how many orders are pending, invoiced, packaged, or delivered.

Automatic packing slips

Once you've confirmed each sales order, convert it into a packing slip with just one click. The details are imported automatically, and you can save the slip, print it, or send it to the customer via email.

Post-shipment updates

After you ship a package, send tracking updates with AfterShip integration. Gain your customers' trust by keeping them informed.

Integrated shipping carriers

Integrate with more than 40 shipping carriers to manage your shipments across the globe conveniently, quickly, and without switching tabs.

Shipping labels and real-time rates

Generate shipping labels from your packing slips, and find real-time shipping costs for each package before you send it to your customer.

Easy drop shipping

No stock left to fulfill the next order? Create a drop shipment and have your vendor ship the package to the client directly.

Inventory reports for smart decisions

Analyze different reports to study the sales trend, best performing item and even more with simple yet accurate inventory reporting options.

Intuitive dashboard.

Get instant visibility into your business at a glance. Get details about unresolved tasks, important notifications, and the overall health of your business.

Sales reports.

Know your best selling products with the sales reports. Also, get details about your best customers and their payment history.

Purchase reports.

Get notified when items run low on stock and need to be re-stocked. Know when items will be received and details about outstanding payments.

FIFO tracking.

Zoho Inventory uses the FIFO method to value the stock. Each and every item in your inventory is accounted for, whether it is coming in or going out.

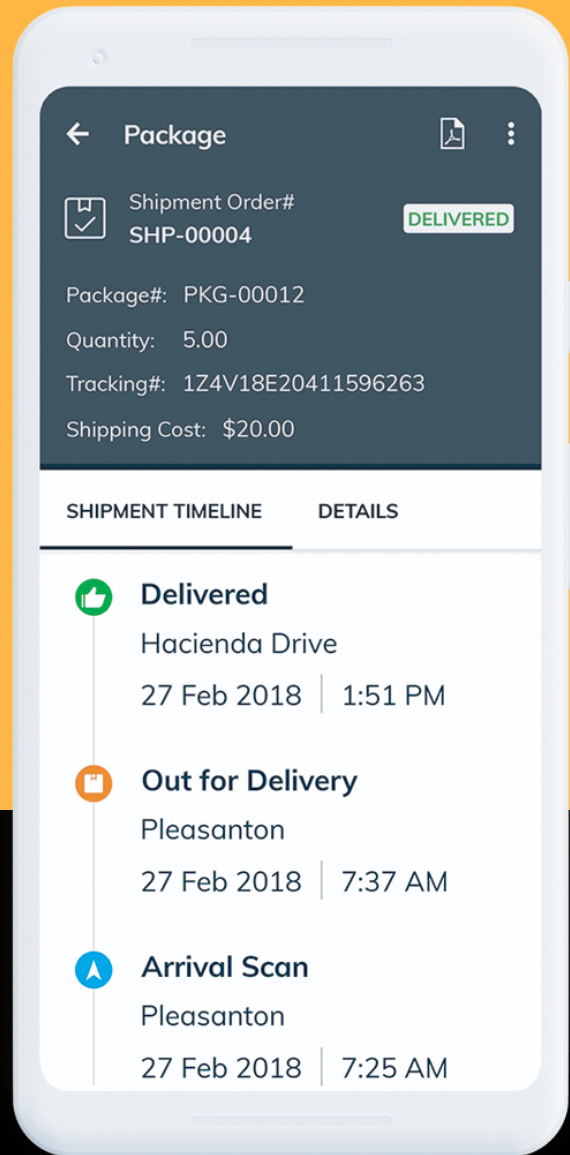

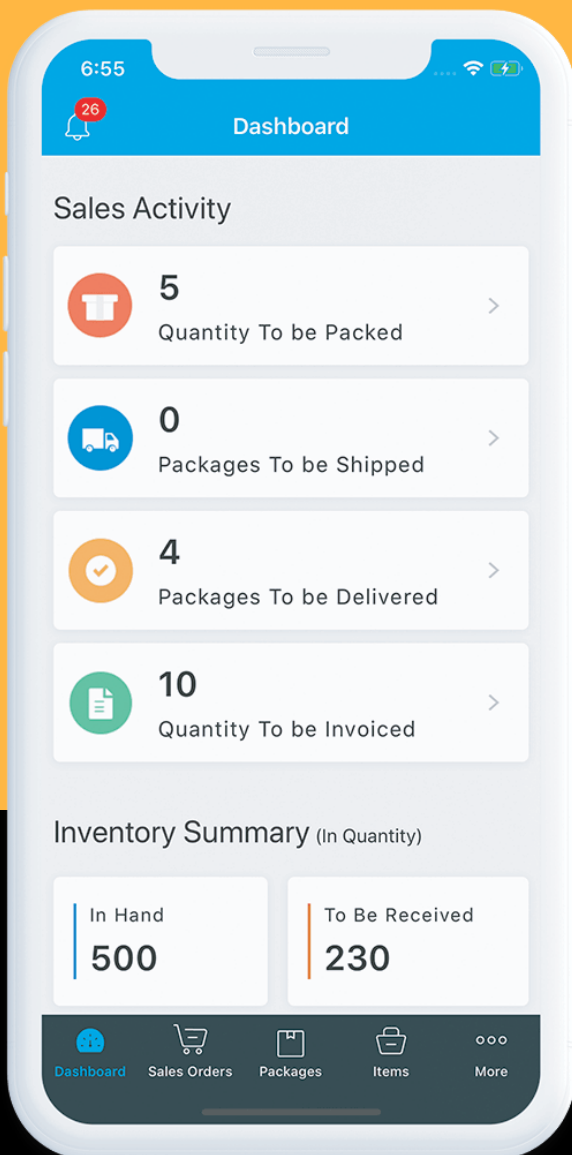

Exportable Reports.

Export your reports to CSV, XLS or PDF files at a click

Go mobile with our iOS and Android app.
