Study guide for Exam MS-900: Microsoft 365 Fundamentals

Purpose of this document
This study guide should help you understand what to expect on the exam and includes a summary of the topics the exam might cover and links to additional resources. The information and materials in this document should help you focus your studies as you prepare for the exam.

Updates to the exam

Our exams are updated periodically to reflect skills that are required to perform a role. We have included two versions of the Skills Measured objectives depending on when you are taking the exam.

We always update the English language version of the exam first. Some exams are localized into other languages, and those are updated approximately eight weeks after the English version is updated. Other available languages are listed in the Schedule Exam section of the Exam Details webpage. If the exam isn’t available in your preferred language, you can request an additional 30 minutes to complete the exam.

Note
The bullets that follow each of the skills measured are intended to illustrate how we are assessing that skill. Related topics may be covered in the exam.

Note
Most questions cover features that are general availability (GA). The exam may contain questions on Preview features if those features are commonly used.

Skills measured as of January 20, 2023

Audience profile

This exam is designed for candidates looking to demonstrate foundational-level knowledge of cloud-based solutions to facilitate productivity and collaboration on-site, at home, or a combination of both. Candidates may have knowledge of cloud-based solutions or may be new to Microsoft 365. Candidates can use this exam to prepare for other Microsoft certifications, but it is not a prerequisite for any of the related certifications.

Candidates should be able to recommend Microsoft 365 solutions that address common organizational IT challenges. They should understand how Microsoft 365 solutions improve productivity, facilitate collaboration, and optimize communications. They should also understand how Microsoft 365 solutions help secure data and identity and facilitate compliance.

Candidates should be able to recommend solutions for endpoint and application management, desktop virtualization, automated operating system deployment, and reporting and analytics. They should be familiar with Microsoft 365 licensing, deployment and migration assistance, and support options for organizations looking to maximize their investment in the cloud.

- Describe cloud concepts (5–10%)
- Describe Microsoft 365 apps and services (45–50%)
- Describe security, compliance, privacy, and trust in Microsoft 365 (25–30%)
- Describe Microsoft 365 pricing, licensing, and support (10–15%)
Describe cloud concepts (5–10%)

Describe the different types of cloud services available
- Describe Microsoft SaaS, IaaS, and PaaS concepts and use cases
- Describe differences between Office 365 and Microsoft 365

Describe the benefits of and considerations for using cloud, hybrid, or on-premises services
- Describe public, private, and hybrid cloud models
- Compare costs and advantages of cloud, hybrid, and on-premises services
- Describe the concept of hybrid work and flexible work

Describe Microsoft 365 apps and services (45–50%)

Describe productivity solutions of Microsoft 365
- Describe the core productivity capabilities and benefits of Microsoft 365 including Microsoft Outlook and Microsoft Exchange, Microsoft 365 apps, and OneDrive
- Describe core Microsoft 365 Apps including Microsoft Word, Excel, PowerPoint, Outlook, and OneNote
- Describe work management capabilities of Microsoft 365 including Microsoft Project, Planner, Bookings, Forms, Lists, and To Do

Describe collaboration solutions of Microsoft 365
- Describe the collaboration benefits and capabilities of Microsoft 365 including Microsoft Exchange, Outlook, Yammer, SharePoint, OneDrive, and Stream
- Describe the collaboration benefits and capabilities of Microsoft Teams and Teams Phone
- Describe the Microsoft Viva apps
- Describe the ways that you can extend Microsoft Teams by using collaborative apps

Describe endpoint modernization, management concepts, and deployment options in Microsoft 365
- Describe the endpoint management capabilities of Microsoft 365 including Microsoft Endpoint Manager (MEM), Intune, AutoPilot, co-management with SCCM, and tenant attach
- Compare the differences between Windows 365 and Azure Virtual Desktop
- Describe the deployment and release models for Windows-as-a-Service (WaaS) including deployment rings
- Identify deployment and update channels for Microsoft 365 Apps

Describe analytics capabilities of Microsoft 365
- Describe the capabilities of Viva Insights
- Describe the capabilities of the Microsoft 365 Admin center and Microsoft 365 user portal
- Describe the reports available in the Microsoft 365 Admin center and other admin centers
Describe security, compliance, privacy, and trust in Microsoft 365 (25–30%)

Describe Zero Trust security principles for Microsoft 365

- Describe the Zero Trust model
- Describe Microsoft Granular Delegated Admin Privileges (GDAP) principles

Describe identity and access management solutions of Microsoft 365

- Describe the identity and access management capabilities of Microsoft 365 including Azure Active Directory, part of Microsoft Entra, and Azure Identity
- Describe cloud identity, on-premises identity, and hybrid identity concepts
- Describe the purpose and value of implementing multi-factor authentication (MFA) and self-service password reset (SSPR)
- Describe the purpose and value of conditional access

Describe threat protection solutions of Microsoft 365

- Describe Microsoft 365 Defender, Defender for Endpoint, Defender for Office 365, Defender for Identity, Defender for Cloud Apps, and the Microsoft 365 Defender Portal
- Describe Microsoft Secure Score benefits and capabilities
- Describe the most common types of threats against endpoints, applications, and identities
- Describe how Microsoft 365 addresses the most common threats
- Describe the capabilities and benefits of Microsoft Sentinel and Microsoft 365 Lighthouse

Describe trust, privacy, risk, and compliance solutions of Microsoft 365

- Describe Microsoft Purview risk and compliance solutions and compliance in Microsoft 365
- Describe how Microsoft supports data residency to ensure regulatory compliance
- Describe information protection features
- Describe the capabilities and benefits of Microsoft Priva
- Describe insider risk management solutions to protect against internal threats
- Describe auditing and eDiscovery solutions

Describe Microsoft 365 pricing, licensing, and support (10–15%)

Identify Microsoft 365 pricing and billing management options

- Describe the pricing model for Microsoft cloud services including enterprise agreements, cloud solution providers, and direct billing
- Describe available billing and bill management options including billing frequency and methods of payment

Identify licensing options available in Microsoft 365

- Describe license management
- Describe the differences between base licensing and add-on licensing
Identify support options for Microsoft 365 services

- Describe how to create a support request for Microsoft 365 services
- Describe support options for Microsoft 365 services
- Describe service level agreements (SLAs) including service credits
- Determine service health status by using the Microsoft 365 admin portal or the Azure tenant portal

Study resources

We recommend that you train and get hands-on experience before you take the exam. We offer self-study options and classroom training as well as links to documentation, community sites, and videos.

Skills measured prior to January 20, 2023

- Describe cloud concepts (10–15%)
- Describe core Microsoft 365 services and concepts (50–55%)
- Describe security, compliance, privacy, and trust in Microsoft 365 (15–20%)
- Describe Microsoft 365 pricing and support (10–15%)

Describe cloud concepts (10–15%)

Describe the different types of cloud services available

- Describe Microsoft SaaS, IaaS, and PaaS offerings
- Cloud-based productivity solutions for organizations and individuals
- Describe differences between Office 365, Microsoft 365, and Windows 365

Describe the benefits of and considerations for using cloud, hybrid, or on-premises services

- Describe public, private, and hybrid scenarios
- Compare advantages of cloud-based services versus on-premises services
- Identify factors that drive organizations to move to the cloud
- Describe hybrid working strategies, flexible working strategies, and frontline workers

Describe core Microsoft 365 services and concepts (50–55%)

Describe productivity solutions in Microsoft 365

- Describe the core productivity and teamwork capabilities in Microsoft 365 including Microsoft Outlook and Microsoft Exchange, Microsoft 365 apps, and OneDrive
- Describe Microsoft 365 Apps including Word, Excel, PowerPoint, Outlook, and OneNote
- Describe work management capabilities in Microsoft 365 including Project, Planner, Bookings, and ToDo (Tasks)
- Describe business class email and calendaring solutions with Microsoft Exchange

Describe collaboration solutions in Microsoft 365

- Describe the collaboration capabilities in Microsoft 365 including Microsoft Teams, Teams Phone, Yammer, SharePoint, and Stream
• Describe the collaboration workloads of Microsoft Teams and the value that they provide
• Describe the core employee experience capabilities in Microsoft Viva
• Describe the ways that you can extend Microsoft Teams by using collaborative apps
• Describe the features of Microsoft SharePoint and Microsoft OneDrive that promote collaboration
• Describe how Yammer helps communities connect and grow

Describe endpoint modernization, management concepts, and deployment options in Microsoft 365
• Describe the endpoint management capabilities of Microsoft 365 including Microsoft Endpoint Manager (MEM), Windows 365 Cloud PC, and Azure Virtual Desktop
• Compare the capabilities of Windows 365 and Azure Virtual Desktop and when it makes sense to implement either
• Describe the deployment and release models for Windows-as-a-Service (WaaS) including deployment rings
• Identify deployment and servicing methods for Microsoft 365 apps

Describe analytics capabilities in Microsoft 365
• Describe the capabilities of Viva Insights
• Describe the capabilities of the Microsoft 365 Admin center and Microsoft 365 user portal
• Describe the reports available in the Microsoft 365 Admin center and other admin centers

Describe security, compliance, privacy, and trust in Microsoft 365 (15–20%)

Explain zero-trust security principles for Microsoft 365
• Identify key components that need to be protected within an organization’s cloud and on-premises infrastructure
• Describe the Zero-Trust model

Describe identity and access management solutions in Microsoft 365
• Describe the identity and access management capabilities in Microsoft 365 including Azure Active Directory, part of Microsoft Entra, and Azure Identity
• Describe cloud identity, on-premises identity, and hybrid identity concepts
• Describe the purpose and value of implementing multi-factor authentication (MFA)
• Describe the purpose and value of conditional access

Describe threat protection solutions in Microsoft 365
• Describe Microsoft 365 Defender, Defender for Endpoint, Defender for Office 365, Defender for Identity, and the Microsoft 365 Defender Portal
• Describe Microsoft Secure Score benefits and capabilities
• Describe the most common types of threats against endpoints, applications, and identities
• Describe how Microsoft addresses the most common threats
• Describe how threat mitigation can be automated with artificial intelligence by using Microsoft 365 and Microsoft Sentinel

Describe trust, privacy, and compliance solutions in Microsoft 365

• Describe compliance solutions in Microsoft 365
• Identify differences between the Service Trust portal and Microsoft Purview Compliance Manager
• Describe how Microsoft supports data residency to ensure regulatory compliance
• Describe information protection and governance options including data loss prevention (DLP) classification labels
• Describe Microsoft Purview Compliance Manager, Compliance Scores, Microsoft Priva, and the benefits that they can provide to an organization
• Describe insider risk management solutions to protect against internal threats
• Describe auditing and eDiscovery solutions
• Describe privacy management concepts
• Describe Microsoft’s privacy principles

Describe Microsoft 365 pricing and support (10–15%)

Plan, predict, and compare pricing

• Describe the pricing model for Microsoft cloud services including enterprise agreements, cloud solution providers, and direct billing
• Describe available billing and bill management options including billing frequency and methods of payment

Identify licensing options available in Microsoft 365

• Describe the available base licensing and management options
• Describe add-on licensing options

Describe the Microsoft 365 service lifecycle

• Describe private, public preview, and general availability (GA) options
• Describe the correlation between lifecycle options and pricing
• Describe use cases and capabilities for the Microsoft 365 Roadmap portal

Describe support offerings for Microsoft 365 services

• Describe how to create a support request for Microsoft 365 services
• Describe service level agreements (SLAs) concepts including uptime principles, service credits for refunds, SLA tiers, roles, and responsibilities
• Determine service health status by using the Microsoft 365 admin portal or the Azure tenant portal
• Describe how organizations can communicate with Microsoft about product and service improvements
