

PO Manager

Smart Purchasing Increase Savings

The key benefit for organizations using our procurement process management solution includes ease of administration and potential long-term cost savings. Having a single interface for procurement-related management information cuts down the time and effort required to monitor organizational spending.

What is PO Manager?

P.O. Manager is a Procurement Process Management System based on Office 365 with the goal to automate the key procurement functions in an organization. Automated activities include submitting and approving procurement requests, selecting and ordering products or services, categorizing spending by multi-level budget categories, controlling budget overruns, generating purchase order (PO) numbers, matching invoices from vendors with generated PO numbers to close the procurement process.

Why customers use PO Manager

- Fast Adoption,
- Easy to use ,
- Time saving,
- Faster approval process
- Compliance with corporate standards

Create and Follow Purchase Requests

Employees can create purchase request in few clicks, and follow the approval process online. The approval process is transparent and allows insight into approval steps and actors.

Purchase Approval Process
