smart knowledge management

## KNOWLEDGE CONTEXT

# Knowledge yesterday vs. today

Isolated knowledge is useless,  
all knowledge must be  
connected to generate all the  
possible value and boost the  
company at all levels

# It's time to change

## OUR OBJECTIVE

## Strategic key to transformation

The challenge:  
The right  
knowledge, to the  
right people at the  
right moment  
without asking

Our solution:  
**everis knowler**  
New knowledge experience.

the knowledge of our professionals and how able  
we are to multiply it to become efficient and turn  
it into the basis of our value proposition.

## OUR OBJECTIVE

# Knowledge first, people first

Knowledge and Information must be shared  
and multiplied at any time and in any place.

**Web  
first**

Year 2000

**Mobile  
first**

Year 2012

**AI  
first**

Year 2017

**Knowledge  
first**

Year 2020

**everis knowler**

Smart knowledge management

**People  
first**

**Let's create a  
Knowledge Driven  
Company,**

What is everis Knowler?

**everisknowler**  
new knowledge experience

**everisKnowler is an end2end solution for KM based on Artificial Intelligence and Ontologies mixing structured and unstructured data (natural language documents) over Office365 and/or any internal company data server**

everis

an NTT DATA Company

**everisknowler**  
new knowledge experience

## What is everis Knowler?

everis

an NTT DATA Company

Do not move your documents into big repositories.  
Do not create huge intranets.  
Leave your documents be !!!

Use technology to read, understand and extract  
the most relevant knowledge from all your  
documents and unstructured data.

Knowler enters the content, analyses it,  
understands it and connects it with everything  
that exists

Data  
Lake

Knowledge  
Lake

A knowledge lake is a Graph Database  
representing ontologies mixing, understanding  
and connecting all existing structured and  
unstructured data

everisknowler  
new knowledge experience

Discover who works with who, who  
knows what, and what connects  
everything and share knowledge inside  
organization, best practises, intranets,  
internal Company regulation, etc.

# The right knowledge, to the right people at the right moment without asking

Smart Knowledge Management

Modern Work Place

Knowledge Mining

Cognitive recommendations

# Benefits & Improvements within any company

# Functionalities
