

MANUFACTURING MANAGEMENT SOLUTION FOR DYNAMICS 365 FOR OPERATION

Annata 365 is a modern cloud-based management solution that meets today's and future business and operational needs for the manufacturing industry.

Annata 365 for Dynamics is a management solution fully integrated with **Microsoft Dynamics 365**, using the standard features of Dynamics for Operations, as well as additional features specially designed to support the material handling, construction, agriculture and equipment manufacturing companies. It handles all key business processes during the entire equipment's life-cycle "from cradle to grave".

WHAT DO YOU GAIN?

- **Functional fit** solution out of the box for **your industry** needs.
- Facilitating your **digital transformation**.
- Certified **future proof solution** through Microsoft Certified programs (CfMD).
- Full integration of **all key business processes** driven by industry specific needs and developed by experts.
- Mostly replacing high number of bespoke **nonintegrated systems**.
- **Process automation** needs, work-flows and **process alerts**.
- **Strong references** around the world to back claims.
- **Powerful**, but easy to use analytic tools.

SALES

Loans

Manage vehicle/equipment loans, calculate interest rates and create collections.

Sales to dealers

Sell vehicles to dealers using integrated sales/transfer process. Manage different sales options and vehicle locations.

Spare parts management

In addition to the storage management features, use the manufacturers spare parts catalog integration together with additional functions specially designed to improve parts handling.

Sales support

Rewards dealers for sales performance. Multiple sales campaigns.

Transfer between locations

Transfer vehicles between locations (warehouses, workshops, dealers etc.). Track vehicle location and transfer status.

Consignment warehouse handling

Manage your consignment stock and track vehicle sales/location status at any point of time.

SERVICE

Work order management

Schedule your resources, plan work-hours and manage the allocation of service orders.

Warranty claims

Create warranty claims based on service orders and process them through to the manufacturer.

Service and maintenance of contracts Create service/maintenance contracts and collect monthly fees.

Service campaigns

Create sales campaigns and add discounts or accessories for specific vehicles/equipment or group.

Maintenance plan templates

Set up a maintenance plan structure and assign it to vehicles/equipment.

Service history

Log vehicle's full service history including claims, recalls and maintenance plans.

CONFIGURATION

Multi-brand handling

Set up and manage an unlimited number of brands. All manufacturer-dependent processes (e.g. warranty process) can be set up based on manufacturer.

Advanced configuration

Configure vehicles individually using the specially designed equipment configuration: with predefined variants, options, components, accessories, etc.

Shipment handling & overview

All vehicles, transported on the same vessel, can be viewed and their progress tracked through shipping, customs, PDI, CoC, registrations etc.

IMPORT

Parts import and distribution

In addition to standard storage management features, use the manufacturer's spare parts catalog integration together with functions specially design to improve parts handling.

Tax and miscellaneous charges calculation

Automatically calculate and include taxes, surcharges and packages for insurance, transportation etc.

PDI and PDS inspections

Create PDI/PDS service orders to prepare the vehicle for sales. The cost can be tracked and assigned to each vehicle.

Accessory installation

Install accessories, track and control the visibility during the vehicle sales process.
