

V-Desk Delivers Flexible Document Management and Workflow Solution Powered by Microsoft Azure to Help Organizations Streamline Core Processes

MICROSOFT AZURE APP BUILDER PROFILE: PRIMESOFT POLSKA SP Z O.O.

Primesoft Polska, a leader in complex workflow solutions in Poland, develops and delivers advanced solutions for managing documents and processes. Primesoft Polska's biggest asset is know-how and expertise achieved through numerous implementations for our clients from various areas of industry in Poland and abroad.

WHAT WE OFFER

V-Desk streamlines the flow of documents and processes in a business, supporting unlimited documents and process instances within the system. The V-Desk system is powered by Microsoft Azure to remain highly available, scale with demand, and reduce implementation costs.

The V-Desk system is a web application for document workflow, which, due to the web-based architecture, is characterized by considerable flexibility and scalability. Building V-Desk on Azure makes the scalability even easier as Azure does not require the costs of additional infrastructure.

The V-Desk system provides optical character recognition technology to help optimize the entering and scanning of documents. V-Desk offers both full-text search of documents as well as the automatic indexing of selected data that describe documents. OCR technology is also available on Azure.

V-Desk powered by Azure is also available on mobile devices, making managing a company from outside the office safer than ever before. Offering mobile apps as part of the V-Desk DMS/workflow system helps facilitate easy and secure access to documents, process instances, and reports.

WHAT OUR CUSTOMERS ARE SAYING

"The implementation of V-Desk offered by Primesoft Polska fully resolved the problem of document management in our organization by streamlining the document workflow." – Andrei Chiru, Controlling Management, Dante International S.A.

Microsoft Azure

Microsoft Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale, and manage applications across a global network of Microsoft data centers. You can build applications using multiple languages, tools, and frameworks.

KEY USE CASES

WEB APPLICATIONS

Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

CLOUD STORAGE

Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

BIG DATA & HPC

Get actionable insights from your data by taking advantage of a fully compatible enterprise-ready Hadoop service.

MOBILE

Accelerate your mobile app development by using a backend hosted on Microsoft Azure. Scale instantly as your install base grows.

MEDIA

Create, manage, and distribute media in the cloud – everything from encoding to content protection to streaming and analytics support.

FLEXIBLE APPLICATION MODEL

Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

ALWAYS ON, ALWAYS HERE

Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

DATA CENTER WITHOUT BOUNDARIES

Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

GLOBAL REACH

With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
