# Reduce Cost and **Maximize** Equipment Uptime

## A modern, highly effective platform that aids in monitoring and managing maintenance processes

Maintenance teams and equipment repair businesses need a 360-degree view of all deployed assets, customer requests, scheduled jobs, assigned workers, and more. It isn't enough to buy a separate application that tracks these resources – for truly effortless maintenance management, you need a solution that perfectly aligns and integrates with your existing business systems.

## Mainteers – Maintenance Management Reimagined

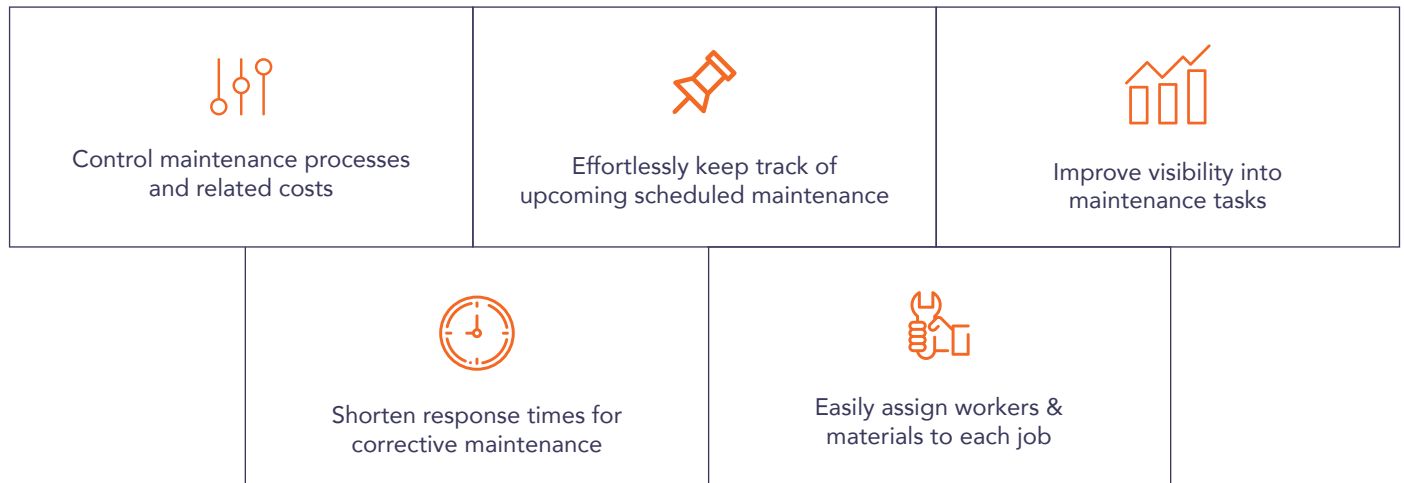

---

Mainteers is a highly flexible solution that enables asset maintenance coordinators, teams, and dedicated field service organizations to effortlessly manage preventive and corrective maintenance of deployed business assets. It improves service request response times, maximizes asset uptime, extends the useful life of assets, and reduces whole-life cost of your deployed equipment.

Built for Microsoft Dynamics 365 for Finance and Operations, Mainteers saves time and effort by seamlessly accessing customer and inventory information from your ERP system. Using a single, shared business application reduces costs and improves cross-department communication. Real-time dashboards and detailed reports provide actionable insights that drive efficiency and improve customer satisfaction.

Through its agility and flexibility, Mainteers addresses core problems that your business is facing and enables you to:

## Features

In-depth reports on work orders, equipment, and field service personnel

Track movement and use of maintenance materials and generate associated purchase orders

Multilevel work order request approval workflows

Easily monitor all assignments and work orders

Support for weekly, monthly, quarterly, biannually, and annually scheduled maintenance

Monitor business operations using intuitive dynamic dashboards

Dashboards & reports enable near-real-time task monitoring that saves time & increases productivity

## Benefits

Shorter work order fulfillment cycles improve revenue

Maximize service personnel utilization by optimizing job scheduling

Prompt incident response reduces equipment downtime and business risk

Mobile app for field staff and maintenance request app with complete workflow
