

The Cloud **Identity Management Solution**

COMPACT IDENTITY

A disruptive technology solution that offers Access Management as well as Governance and Administration, Compact Identity utilizes high-powered analytics and business intelligence. It is also available as cloud-delivered microservices with user-selectable modules. With Compact Identity, you are billed on consumption and incur lower Total Cost of Ownership.

The solution is a comprehensive IAM offering with modules spanning basic IAM features (SSO, Password Management), wholesome Governance and Administration features (spanning ULM, Provisioning, Segregation of Duties and Access Certification) as well as advanced Governance features (spanning PAM, EMM, API Management, and IoT Device Management).
