

# WorkFlowWise CORE

## Digital Advantage. Achieved.

### Low-code Platform

The platform is specifically aimed at creating workflow applications. Our multi-device and cross-platform solutions improve productivity, transparency, and accountability. It ultimately uncovers precious activity that adds value to your business.

### Smart Automation

Technology gives rise to new challenges and opportunities. WorkFlowWise offers smart, flexible, and cost-effective apps and solutions that unlock business value from any type of recurring transactional workflow.

### Cloud-based

Our workflow solutions combine operational efficiency and business outcomes. Back office burdens become effective business processes that open new opportunities.

### Recurring tasks

Processes can start sub-processes. People in or outside the organization can complete any action. A software robot can perform any recurring tasks; never losing focus and always on duty. So your people can be free to focus on applying their creative minds and expertise on adding value to the business.

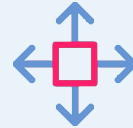

### Building Blocks

Speed up the development process with building blocks. You'll be surprised at how quickly you can build and deploy your app. And your customers will be delighted to reap the business benefits and experience better business performance.

#### Table Designer

Create and modify your own data structure with all the validations, checks and balances of Microsoft Azure SQL.

#### Graphical Workflow Designer

Structure and automate workflows, no matter how complex. In a few clicks, you set up a process with all its logic.

#### User-interface Designer

Show or hide data based on the roles and steps in a workflow. Add unique buttons to take specific actions in a data form. Enforce your business rules.

#### Scripting Engine

Use CoffeeScript, which automatically compiles as JavaScript. Consultants will be able to implement powerful scripts beneficial to the business.

#### Reporting Tool

Design clear reports and graphs to gain insight from the data in your workflows. Use traditional formats or add graphs and diagrams.

#### Interfacing

No task-driven application runs in isolation. Enable your apps to send and retrieve data with your existing in-house systems.

Any integration possible

Powered by

Microsoft Azure

And more....

#### WorkFlowWise GO Off-the-shelf

Ready-made, ready-to-use apps for everyday business processes.

Made for all. Built by us.

#### WorkFlowWise FLEX Tailor-made

App-building platform to build your own workflow apps.

Made for you. Built by you.

WorkFlowWise

WorkFlowWise**CORE**

Learn how you can use our platform for your workflows:  
[www.workflowwise.com/core](http://www.workflowwise.com/core)

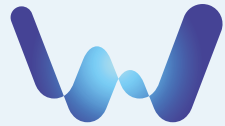

## Platform for developers. *Made for you. Built by you.*

All our solutions are built and work on our core Application-Platform-as-a-Service (aPaaS). In fact, you can even use it to build workflows yourself.

### The CORE Building Blocks:

Table Designer  
Workflow Designer  
User Interface Designer

Scripting Engine  
Report Designer  
Interfacing

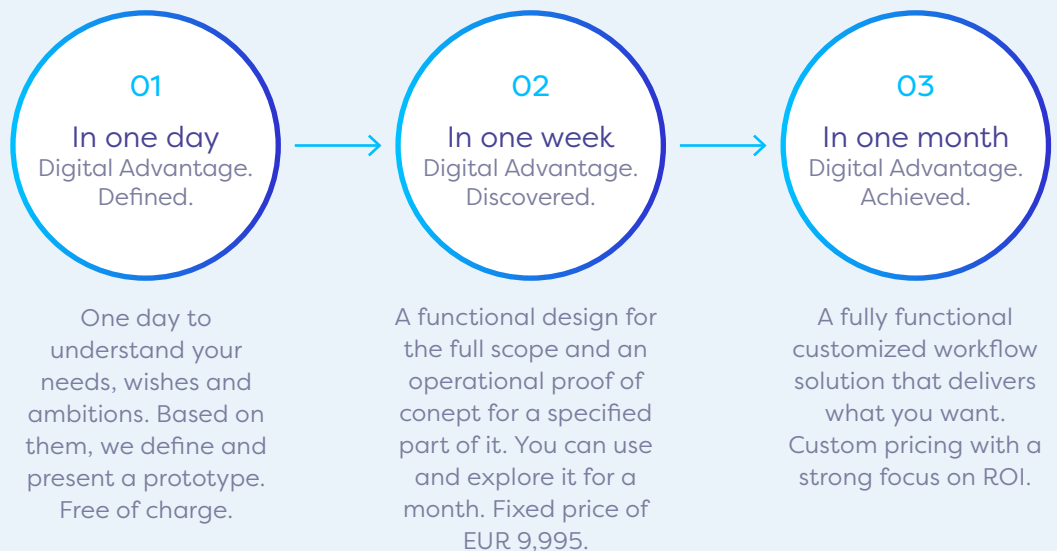

WorkFlowWise**FLEX**

## Customized solutions. *Made for you. Built by us.*

How effective are your workflows? Are you getting everything you want from your existing approach – automated or not? Are they adding value or creating hassle? We'd love to talk to you about how a WorkFlowWise FLEX solution could help.

### Your business, your workflows. New thinking needed?

Our unique approach to custom solution development minimizes risk and exposure incrementally for every step during the project. Customers are always in control and get exactly what they expect.

WorkFlowWise**GO**

## Off-the-shelf apps. *Made for all. Built by us.*

A growing suite of ready-made, easy-to-deploy apps that integrate seamlessly with existing in-house systems. Paper becomes digital. Information becomes insight. Time-consuming becomes time-saving. Your admin burdens of the past free up time to create a business edge for the future.

### We currently offer the following ready-made apps:

**GO-Expense**  
Simplify claims approval and management at the same time with GO-Expense.

**GO-Spend**  
End-to-end control over company expenses with GO-Spend. The procure-to-pay app for finance and purchasing departments.

**GO-Check**  
Make sure you think of everything. Set up layered checklists for recurring tasks.
