Applying cutting-edge technology to the collection, sorting and recycling process, with the aim of making management more efficient, effective and sustainable.

Box 4: What is Onesait Disruptors Sustainability Waste?
Disruptors Sustainability is a platform for the smart management of waste, used by the agents involved in the circular economy, providing IoT and analytical capabilities (at operational and socio-economic level). The value is based on the impact on relevant stakeholders:

Citizens
- More sustainability city
- Participation in city life and access to useful local information
- Improved quality services

Local Public Entities
- Tracking performance and efficiency in services
- Public visibility of initiatives
- Analysis of citizen perception (social networks, polls, etc.)

Service Providers
- Customer needs prediction
- Dynamic routes
- Brand
