

#1 RF Data Collection Solution for Microsoft Dynamics 365 for Operations

RF-SMART has over 300 Microsoft Dynamics customers around the world. Our deep experience in logistics and supply chain processes, mobility and Microsoft Dynamics enables our team and our network of partners to deliver a level of quality, performance and value that is the gold standard for Microsoft Dynamics mobile solutions.

What Makes RF-SMART The Best Choice

- Our workflows have built-in data validation logic and point-and-click administration tools
- No modifications to Dynamics 365 are needed, which is the ISV strategy recommended by Microsoft
- Natively multimodal, RF-SMART supports the interchangeable use of barcodes, voice and RFID
- RF-SMART is a version-controlled software product, not an experiment from a mobile start-up company
- Our solution is proven across industries and around the world

Multiple Configurable Workflows for Microsoft Dynamics 365

RF-SMART provides workflows for Dynamics 365 for Operations in the following process areas:

- Receiving
- Inventory Control
- Pick-Pack-Ship
- Production

Why Data Collection vs. Other Projects?

RF data collection – commonly referred to as barcoding, scanning or RF – is the fastest and most effective way to increase inventory accuracy to 99.99%, improve picking accuracy to 99.99%, and enhance productivity by up to 40% in logistics environments.
