

# Mobile Order Management Application

Take orders with ease directly on customer premises

**Improve a company's performance by delivering excellent customer satisfaction through accelerated requisitions, cost management and administration process.**

## What is Ordertake?

Ordertake is a simple to use mobile order management application created for sales representatives to quickly and easily process requisitions on the move. Designed to be ERP agnostic and hosted on Microsoft Azure Cloud, Ordertake reduces paperwork, allows users to access any required information and speeds up the requisitioning process.

## Enhanced Efficiency

Speed up the ordering process with an order management application that simplifies the whole process. Once the order is created, the delivery is triggered, so the customer doesn't have to wait long to get their order. The efficiency is translated into quality of care that can be measured.

## Excellent Service

Designed to take orders directly online or offline anywhere, Ordertake guarantees a smooth and seamless experience. Management can immediately visualise the cost per ward, the demands being triggered and cost-driven KPIs via Ordertake. Ordertake caters for clinical stock and services needed to provide a solid Sales & Distribution supply chain.

## Why use Ordertake?

- Eliminates manual processes
- Allows to process orders faster, mobile & offline
- Gives access to up-to-date product & consumable information
- Integrates with any ERP
- Can be used as a digital catalogue saving printing costs
- Boosts the professionalism, mobility and ease of working in any Sales & Distribution company.

## All Information at Your Fingertips

Ordertake includes a customer list, past orders, credit information, and other critical data, so your user may have access to information required to proceed with the generation of Sales Orders. With the catalogue included as part of the app, the workforce will always have the latest product information at hand.
