CIVILUE POWERED BY INNOVATIVE MARKETING BOTS TECHNOLOGY

ANALYZE

- Integrate online and offline customer behaviors to truly understand needs and preferences
- Identify customer specific opportunities in each category and for each product he or she purchases

PERSONALIZE

- Drive a higher degree of engagement through hyper relevant offers
- Generate smart shopping lists, product recommendations, and purchase reminders
- Personalize and digitize the weekly circular

MONETIZE

- Share customer insights and collaborate with your suppliers
- Provide suppliers with 'direct-to-customer' marketing capabilities through your retail

In today's hyper-competitive retail market, success hinges on becoming your customers' "Retailer of Choice" in multiple categories.

CIVALUE KEY DIFFERENTIATORS

- Self-service product, not a service Eliminate reliance on highly priced consulting and the integration of different technology solutions
- **Purpose-Built for higher frequency retail** Access sophisticated customer insights and targeting capabilities through lengthy technology projects, without constraints or limitations.
- Al-Powered Automated Customer Data Science Illuminate a myriad of actionable customer attributes and predictive shopping patterns, reducing the need data analysts and scientists
- Self-learning, high volume personalization Continual improvement in the insight accuracy and automated targeting results through proprietary machine-learning algorithms
- Implemented within 6-8 weeks A cloud-native, retail solution with reduced implementation risks, and minimal upfront capital investment
