

# Patrick

(powered by PixAlert's AI)

Google your network

Speak to your data

**Patrick** is your networks data butler

Monitor Staff Behaviour

Audit your Data

Google your entire network....

PATRICK

.....instantly

Don't just search your network systems and key products

**ORACLE**  
DATABASE

**DB2**

 Office 365

  
Microsoft  
SharePoint

 Microsoft  
Office

**CITRIX**

**UNIX**

Linux

 **IBM**  
Lotus software

 Microsoft  
Exchange

**Novell**  
GroupWise

 Microsoft  
SQL Server

search your cloud too....

.....and every device and document  
in your network

Patrick will search your video and audio files too

but Patrick does way more than that

it's smart

Patrick can track infinite forms of user behaviour

like bullying....

Watching pornography....

.....or even Netflix streaming

what are you watching?

**nothing.**

or malicious activities

Patrick can audit your network too

Patrick will find and shut down financial breaches

Patrick will find and manage your GDPR breaches

**General  
Data  
Protection  
Regulation**

**Patrick** can respond to consumers and staff submitting GDPR Requests

or help Government bodies search out and respond to FOI requests

Patrick will help with your industry standards

Need help knowing what is in your network?

Patrick can help

Patrick will classify your data so it can be actioned automatically

Patrick can  
Delete  
Destroy  
Encrypt  
Quarantine

Would you like to ask your data questions?

**Patrick** is friends with IBM's Watson and Microsoft's AI so that you can interrogate your data using natural language questions, automate your client interacts and so much more.

Please feel free to get in touch

**Patrick** would love to hear from you
