

CHEQ

The first official communication channel for physical workers

PAIN

In today's working environment corporate digital communication either runs in uncontrolled WhatsApp and messaging groups or it does not even exist. Nevertheless, it is impossible to manage it at scale.

SOLUTION

Cheq is an easy to use solution on Viber Platform to bridge the communication gap between physical workers and employers, powered by Artificial intelligence.

WHY IS CHEQ BETTER?

It provides tracked, logged, top-down official communication. Structured information gathering becomes available from bottom-up. You can automatically invite and delete users, as you hire and fire.

WHEN SHOULD YOU USE IT?

Cheq becomes essential in case you have over 100 physical workers.

WHY IS IT GOOD FOR YOUR EMPLOYEES?

Users will love it as Cheq empowers the physical workers with real-time, reliable information. It can also provide an anonym whistleblower system for corporate compliance. Users are also going to benefit from faster access to company provided self service solutions:

- FAQs
- Hazard report, like in Waze
- Payslip
- Certificate of employment
- Duolingo type trainings
- and much more...

Everybody has a smartphone

USE CHAT TO YOUR ADVANTAGE!

Our unique bots are built from over 30 integrable function modules and leverage the chatbot-marketing know-how built from tens of millions of conversations. All chatbots we've ever made are different, because they are tailored to the needs of each client. This is also a marketing and content management service besides the software development. Cool isn't it?

Let's see our 3 main components:

Interaction automation

Improve communication with workers without increasing management effort. Automate the most frequent employee-originated requests.

Enterprise-grade technology

Cheq is based on a proven, award-winning chatbot framework developed by Talk-A-Bot. This system supports banks, government bodies and passed various IT security tests. Data management is fully GDPR compliant.

Communicate at scale

Proven reliability and performance to communicate with hundreds of thousands of people simultaneously. Monitor, report and manage what happens in the organization.
