

Platô 365 for Corporations

Enhance your business with **interactive and virtual environments** as professional qualification intermediaries.

Distance Learning (DL) is a learning modality that allows you to provide a high-quality study in a flexible format. It is a technology-mediated system with the advanced features of the media, especially the Internet and technology platforms customized for your business.

Platô 365 Solutions for Cloud-based Distance Learning

Platô 365 wants to help you develop a cloud-based Distance Learning system that works on a stable, easily scalable, with high availability and customized platform. Thus, your employees will enjoy a collaborative, productive and efficient experience.

In order to create a sustainable organizational culture, this integration enables uniform communication from the top to all the other corporate relationships.

Your corporation benefits from implementing Platô 365 because it:

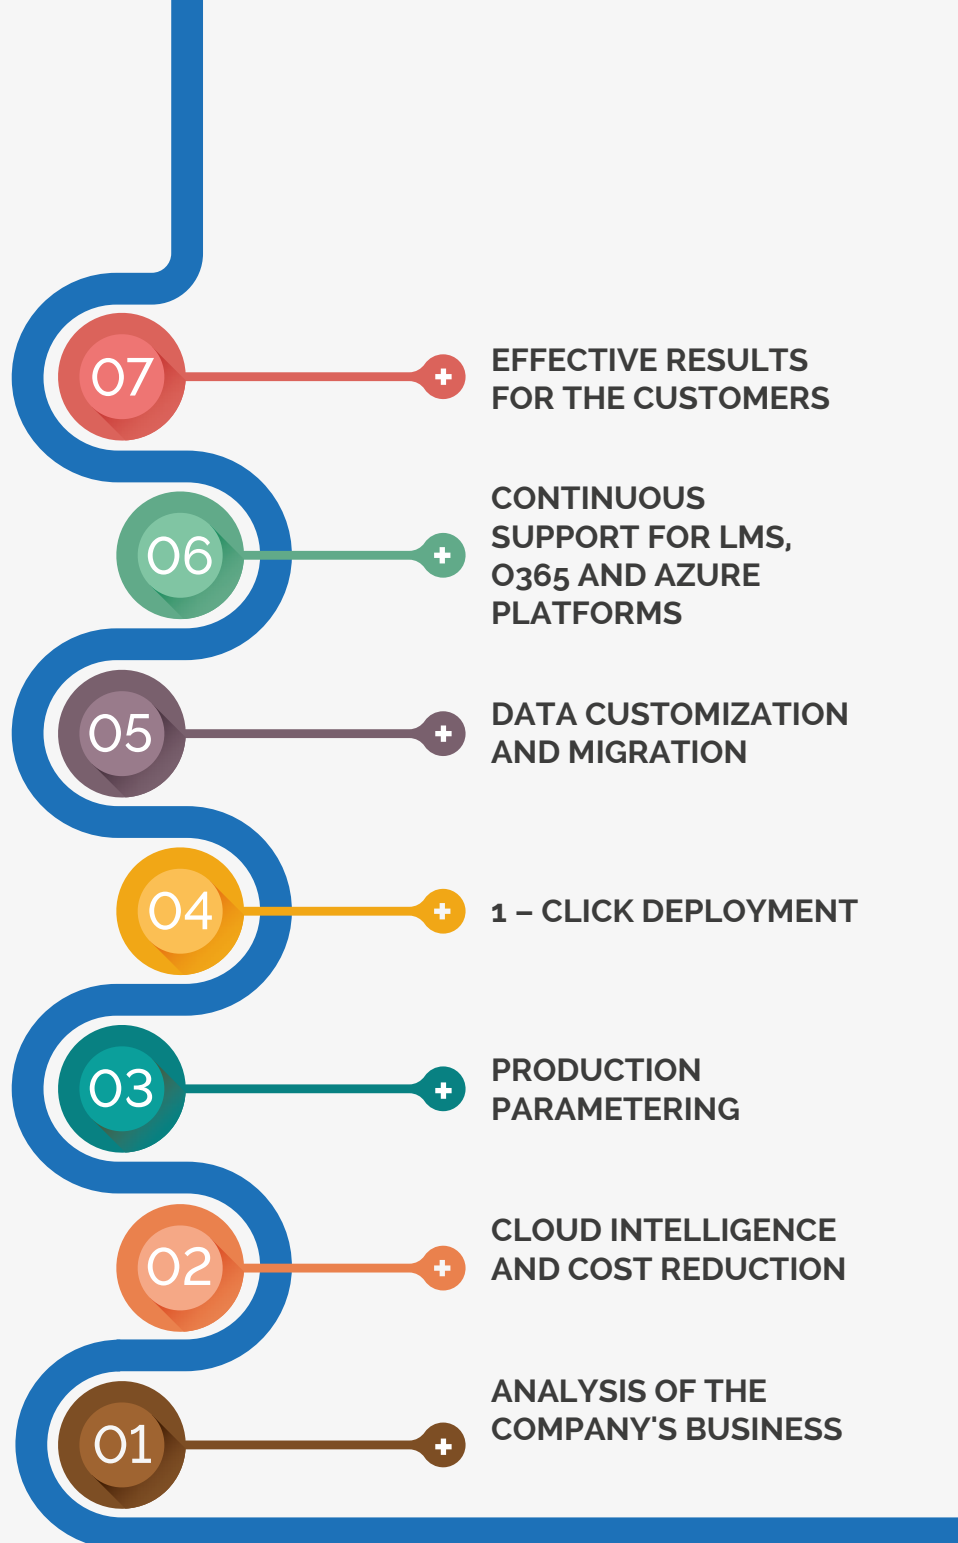

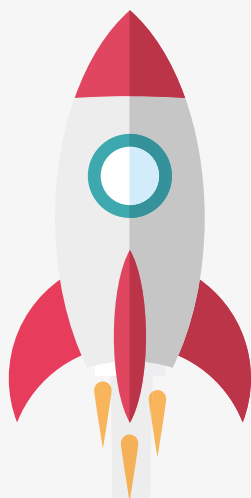

- ✓ Doesn't require a complex Infrastructure for training;
- ✓ Minimizes the need to move staff to internal or external training environments;
- ✓ Reduces operating costs of individual training, especially in cases with specific requirements or turnover;
- ✓ Simplifies the integration process of new employees, customers and suppliers, and all the coaching related to hiring and training;
- ✓ Facilitates expansion with increased demand and content;
- ✓ Improves communication between instructors and partners through a dynamic and integrated virtual environment.

Platô 365 Cloud-based Distance Learning solution provides the tranquility you need to stay focused on the Core Business and the administration of your University. Therefore, it offers subscription plans and managed services for customized implementation, integration and support. Thus, it ensures environment continuity and stability with an expansion capacity which is ideal for all content and data required.

Check the 7 Steps to Cloud- based DL Success

A solution that allows you to use work tools in the same environment as the improvement platform.

Platô 365 Features

HIGH AVAILABILITY

We guarantee a High Availability infrastructure with contractual SLA (Service Level Agreement), ensuring the continuity and stability of services.

UNLIMITED SUPPORT

We perform unlimited advanced support, with no restriction on the amount of calls or working hours, for the entire infrastructure environment. Moodle support hours can be included if necessary.

SCALABLE

We automate growth capacity, either to increase the amount of content or the demand of simultaneous access during exam seasons or new courses, without any impact on school activities.

DEPLOY IN 1 CLICK

We automate our solution deployment to create an entire environment in just 1 click. Don't waste time on endless projects and make your DL available in a matter of minutes.

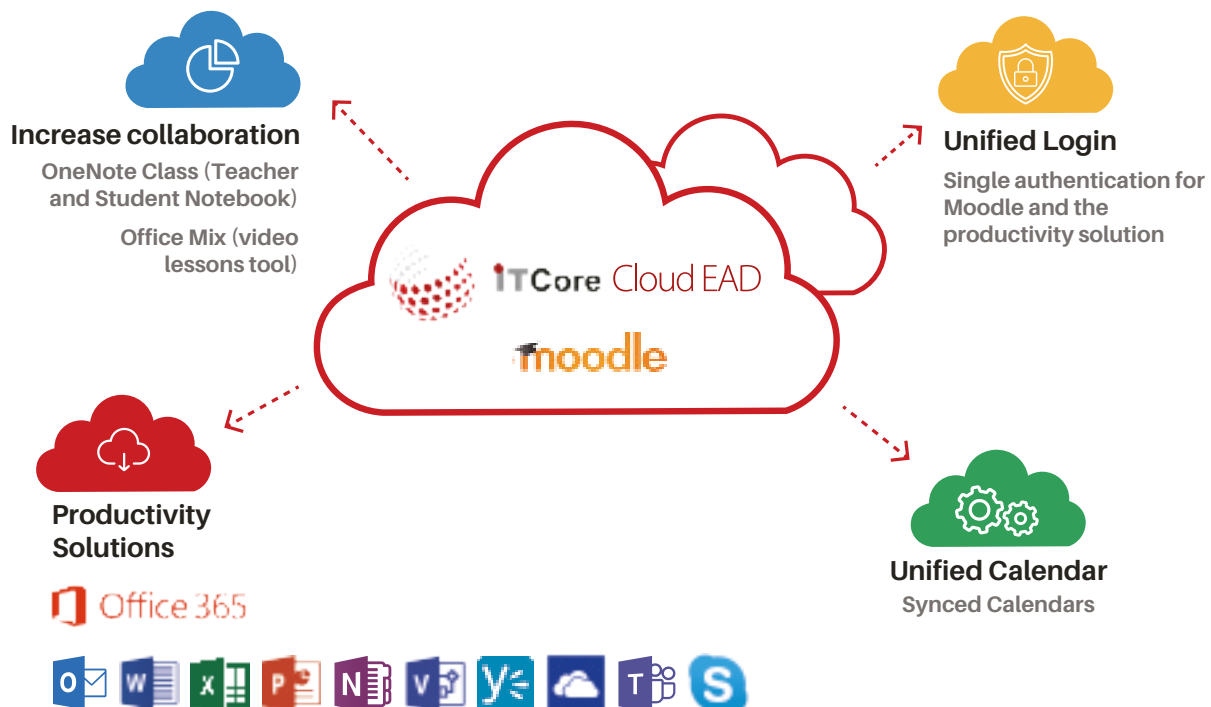

BACKUP

We increase your corporation's data and server protection. We provide specialized support for apps, servers and data backups, as well as geo-replication capability.

Microsoft Office 365 Integration and Collaboration

Platô 365 Cloud-based Distance Learning System enables: Unified login, integration with Microsoft collaboration and productivity tools, Workload, server and user optimization

Therefore, HR department and Area Managers get a more efficient integration, with work tools that allow them to collaborate and manage their collaborators and partners training.

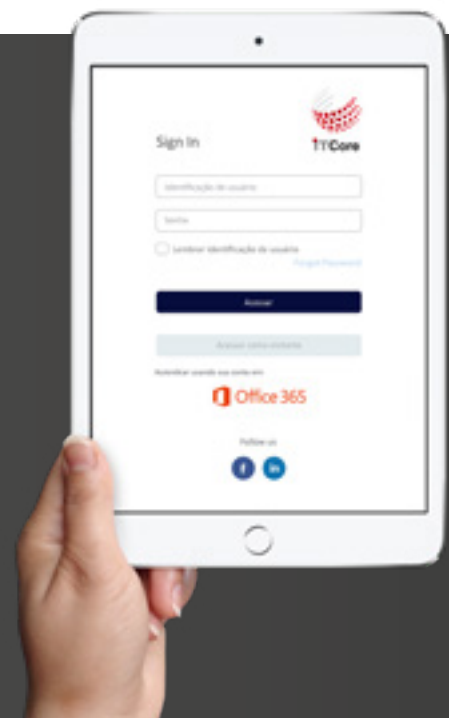

More Platô 365 solution facilities for your Corporation

TEACHERS TRAINING: Platô 365 trains and empowers your teaching staff to take full advantage of the LMS platform (Moodle) integrated with Microsoft education tools, providing your corporation's Digital Transformation.

MICROSOFT O365 INTEGRATED APPLICATION: Platô 365 is an exclusive application that is integrated with Office 365 Education.

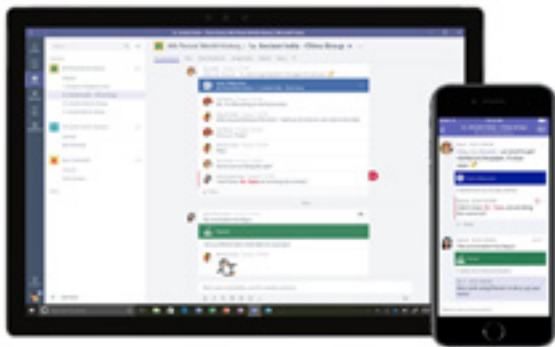

UNIFIED LOGIN: Your university may provide a single login to the institution's employees and students for the LMS (Moodle) solution, integrated with the Microsoft Directory of users on your local area network, integrating and facilitating unified access with Student Management platforms (ERP).

UNIFIED CALENDAR: Simplify teacher-student communication through calendar synchronization of your LMS (Moodle) and Outlook (e-mail) classroom.

CONNECTED AND MODERN TOOLS FOR A COLLABORATIVE CLASSROOM: Microsoft Office 365 tools are integrated with Moodle Distance Learning platform, enabling greater interaction in student-teacher relationships, mainly due to features such as:

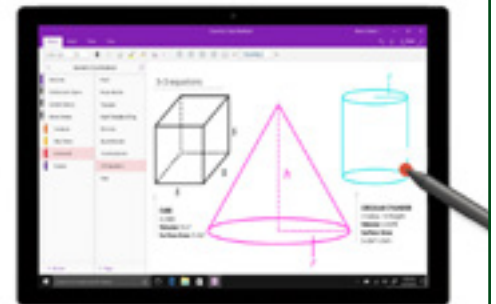

TEAMS - CREATE COLLABORATIVE CLASSROOMS

Manage your school workflow easily and include each student's opinion.

With Teams, keep everything you need at your fingertips with Class Notebook, Papers, Office applications and files embedded in each class. Give voice and choice to students, with rich conversations, video and ludic content

ONENOTE: A MODERN NOTEBOOK FOR ORGANIZATION AND COLLABORATION

Organize didactic content and prepare tasks with handwritten texts, web content, and even audio and video from your devices. Now, work with your students and colleagues more easily.

SKYPE IN THE CLASSROOM

Integrate Skype with your LMS (Moodle), and make your live lessons more dynamic and interactive

CUSTOMIZED TO MEET YOUR NEEDS IN A SAFER ENVIRONMENT

Teams delivers the features you need from Office 365, such as corporate security and compliance, including eDiscovery and legal hold of channels, chats and files. Manage the way your institution communicates with new controls designed for education, including the removal of offensive posts or disabling the sound of class conversations.

**Platô 365 is the only
solution 100% integrated
with Microsoft Office 365!**
