Why SmartKargo?

SmartKargo provides all standard cargo functionality needed by today's Airlines on a **single information platform**.
Features include:

- **Full Front Office Capability for Sales and Ops Management**
- **Actionable Cargo Revenue Management**
- **Cargo Revenue Accounting**
- **Full Warehouse Management Capability**
- **Comprehensive Tracking and Audit trail**
- **Full Featured Mobility and Business Intelligence**
- **Door-to-Door functionality to support e-Commerce**

Built on the World's Leading Cloud Platform

Microsoft has invested multiple billions in global cloud infrastructure, which allows SmartKargo to serve the global requirements of international airlines, their customers and partners. *Our partnership means the solution is:*

- **End-to-end, scalable with a secure operating environment**
- **Failsafe solution with built-in redundancies**
- **Technology never becomes obsolete**

"SmartKargo empowers airlines to digitally transform their business with robust mobile applications and advanced technologies while providing seamless interface with existing airline systems via API's—for fast deployment.

SmartKargo

Simply the World's Most Advanced Air Cargo Management Solution

SmartKargo

Increase Cargo Revenues, Improve Service, Extend Reach

SmartKargo enables airlines around the world to enhance their revenue opportunities and improve operational efficiency — while maximizing the use of their available assets.

The exponential growth in global e-commerce shipment volumes and the need to ship packages from door-to-door has significantly changed the nature of traditional air cargo. SmartKargo allows global airlines to embrace this rapid change and explore the opportunity to improve *profits*.

What is SmartKargo?

SmartKargo Software as a Service (SaaS) is 'Born on the Cloud' Technology focused on providing solutions to the Air Cargo industry.

Through a strong partnership, SmartKargo leverages the multi-Billion dollar investment of Microsoft Corporation and deploys on the MS Azure hyper-cloud platform.

SmartKargo seamlessly supports both air-to-air and door-to-door businesses and is delivered with the highest levels of scalability, redundancy, security and compliance commercially available today.

Fast deployment of advanced technology facilitates the fast evolution of an airline's cargo business

SmartKargo's 100% Cloud computing SaaS solution enables service providers to quickly implement it—empowering customers to keep up with the real-time complexities of the freight business. This means that integrations with existing airline systems can be surprisingly quick and seamless. And all of the functionality needed to provide industry-leading customer service is there—including all of the functionality needed to provide industry-leading customer service. Tools such as mobility for end-to-end shipment management empower customers and streamline airline operations.

Our Portfolio

From the Airline Front-office to B2B and B2C Door-to-Door, we've got you covered.

SmartKargo Cloud – *End-to-End Cargo Management software that is so easy to implement and use.*

SmartKargo Portal – *Advanced capability to enable customer empowerment and self service.*

SmartKargo Link – *Expand your network and establish new partnerships using Link API's.*

RushKargo – *Extending an airline's reach to pickup and deliver at the door.*

What if you could deploy a future-ready platform in months, not years?
