

## Fair estimation of vehicles repair costs in few minutes, not days

Servicing Assessment & Repair Appraisal calculator by Avtopro is the best solution for corporations with a large car fleet, insurance companies and service stations to make quick search and calculate the cost of auto parts. Using the latest Microsoft technologies in cloud computing and machine learning, we could create a unique solution that copes with big market data helping experts to make the best choice from our extensive database.

Thousands of suppliers offer auto parts of different quality and prices, under different purchase and delivery conditions. When you are tasked with choosing not just one but a bunch of spare parts for multitude of cars – this might seem to be impossible task.

SARA allows to make significant savings on the cost of spare parts without losing in quality, it helps experts to make the best choice from our extensive database of auto parts, greatly reducing the time compared to manual search and selection.

What used to take hours or even days, is now just several clicks away.

SARA solution proved to be working efficiently in Ukraine, Russia and Belarus, it allows to add your own suppliers and work with them in any new markets.

### How it works

The process of selecting auto parts is very similar to the search for air tickets.

Search result offers available options and you only have to make a choice of what to add into the basket. We do not use your information but only provide the service. You independently manage your data at your discretion. Total transparency and full control.

## **Total transparency and full control.**

Total transparency and full control.  
Easy search with results directly from sellers.

We offer more than 50 parameters of search configuration for the best results.

## **Native team of experts**

Proprietary database, which we have manually verified.

Daily updates of 500 mln. items from 15,000 sellers.

The possibility of manual check and correction of results.

We are expanding our database every day, for 18 years now.
