safeguarding adoption

You only get one chance to introduce your Intranet. Based on 16 years and 500+ deployments we bring our experience to you.

- Architect the right structure for your organization
- Change management strategy
- Control the roll out of technology
- Govern the Office 365 your organization uses

technology & support to protect your investment

Controlled Deployment

Choose what features you want to deploy, and when they update.
(rapid start-up, choose)

Branding

Take advantage of what Office 365 provides and match your corporate brand.

Personalization

Provide your employees with the most relevant content they'd be interested in.

News and Events

Have the flexibility to control how items are authored, unified and viewed across a flat structure.

Search and Find

Simplified search allowing quicker filtering and identification of relevant content.

Analytics

View and analyze critical data to determine your Office 365 adoption.

advanced technology

Connecting to Employees

Search, find and connect with fellow employees based on key organizational attributes.

My Teams, Sites & Outlook Groups

One place to present all Office 365 collaboration and communication access.

Advanced Navigation

Beyond just a graphic representation, this navigation allows you to create a virtual hierarchy, provide built in contextual elements, and is good looking.

Workspace Request & Creation

Sub-Title: Guide your employees through the creation of collaboration and communication features, based on pre-set templates. Add a workflow to approve of their selection.
