

JDA Workforce Management Cloud

Evolve Faster and Empower Your Workforce

Drive employee engagement, keep up with changing regulations and optimize your workforce across corporate and retail locations with JDA Workforce Management Cloud. Running on the Cloud, your business and employees always have the latest version of our WFM solution with the newest features without any downtime or resource-intensive updates.

Keep members throughout your business connected with the shared platform while powering a more positive customer experience. The WFM Cloud offering is designed to offer an intuitive and powerful way to optimize your entire workforce – faster. Plus, by tapping into JDA's experience—and features that keep your entire organization connected across all mediums—retailers of all types can quickly launch JDA WFM for immediate results.

Why move to the Cloud?

With JDA Workforce Management on the Cloud you can:

- Start your rapid deployment in days and implement smoothly with dedicated experts in JDA Workforce Management.
- Realize an immediate impact across key metrics including customer service levels, on-time deliveries and capacity utilization.
- Achieve a quick ROI with faster performance and results by minimizing maintenance time and costs.
- Lower your total cost of ownership (TCO) and let JDA's experts handle IT infrastructure, upgrades and maintenance challenges.
- Support continuous performance improvements with the information and analytics necessary for instant corrective actions.
- Start the foundation for your Autonomous Supply Chain™ with native integration to JDA's edge technologies and artificial intelligence solutions.
- Configured to your business

◆ Key Benefits

JDA's custom Cloud approach for Workforce Management delivers these benefits and more:

- **Optimize your workforce** with advanced scheduling for a more positive customer experience
- **Engage gig economy workers** with flexible scheduling that matches their lifestyle
- **Navigate legal and market compliance challenges** for T&A scheduling
- **Support your employees** on your terms – configure your Cloud bundle to your unique business needs

The scalable and flexible solution is built to meet the changing needs of enterprise labor requirements and configure to your unique business needs. Based on your needs, you select the right base solution for your organization – Advanced Scheduling, Time and Attendance or Advanced Scheduling and Time Attendance. You can customize your bundle by including add-ons like Employee Self Service, Business Analysis for Store Operations, Scheduling Shift Connect, JDA Workforce Management Mobile and Labor Planning and REPL WFM Connect.

**With JDA
you can plan to deliver.**
