JDA Warehouse Management Cloud:

Drive Agility and Efficiency — Faster and More Affordably Than Ever

JDA Warehouse Management has helped hundreds of companies master the efficient execution of inventory management and order fulfillment processes — even in today's world of constant disruptions and surprises. Leading manufacturers, retailers, distributors and third-party logistics providers (3PLs) rely on JDA Warehouse Management to maximize the efficiency of their daily operations, while also enabling agility and responsiveness when the unexpected occurs.

With the introduction of JDA Warehouse Management Cloud, it's faster and more affordable than ever to implement this powerful solution and begin realizing the benefits.

Companies can achieve a dramatic reduction in their total cost of software ownership by relying on JDA WM Cloud for deployment, management, staging and monitoring. Not only are internal staff freed to focus on higher-value activities, but the steep capital expenses associated with IT infrastructure are replaced with a flexible pricing model that reflects actual software and cloud usage.

New to the Cloud? Rely on JDA, Your Trusted Partner

Most businesses today are exploring the value of a cloud approach for hosting and managing their critical solutions, including JDA Warehouse Management. Given the fast-paced, ever-changing nature of warehouse management — as well as the sheer number of products, employees and tasks involved — the elastic capacity and 24-7 availability of cloud computing makes this approach an obvious solution.

However, some businesses are investing in private clouds, or contracting with commercial, third-party cloud providers who host a wide range of off-the-shelf software. These options fall short when

◆ JDA WM Cloud: Real Results

By leveraging JDA WM Cloud to implement and manage JDA Warehouse Management, companies can realize a range of benefits, including:

- **Reduced time to value.** Software is up and running faster, leading to a rapid return on investment.

- **Access to the newest software and latest IT resources.** Via JDA WM Cloud, customers always have access to the newest software features and functionality. JDA also provides access to world-class IT resources with zero capital investments.

- **Lower cost of ownership.** Via a software-as-a-service (SaaS) model, customers benefit from the most cost-effective approach to access the power of JDA.

- **Increased availability and uptime.** JDA WM Cloud offers multiple service levels and seasonal pricing to align customers' investments with their needs. Robust backup and delivery can also be custom-tailored to meet the needs of the most demanding warehouse environments.

- **A foundation for the Autonomous Supply Chain.** With seamless linkage to JDA's next-generation artificial intelligence solutions, Luminate Warehouse Tasking and Luminate Control Tower, JDA WM Cloud makes customer supply chains more cognitive and automated.

compared to JDA WM Cloud, which is built specifically for the way warehouses, and warehouse employees, work every day. It's also configured specifically for the features and functionality of JDA Warehouse Management.

User-friendly interfaces and workflows make it easy to manage everyday tasks like receiving, inventory control and order processing via the cloud. All the essential information warehouse managers and employees need is placed right at their fingertips.

Not only does JDA WM Cloud deliver a secure environment that protects customers' sensitive data — a tremendous area of focus for CIOs in an increasingly direct-to-consumer business environment — but it also eliminates the significant time and costs associated with building and maintaining cloud-computing resources. Companies always have access to the latest hardware and processors, without the need to make continuing capital investments. In addition, daily administrative tasks — such as software upgrades, patches and system maintenance — are managed seamlessly and invisibly by JDA.

With more than 4,000 customers worldwide, who knows JDA software better than JDA? Companies just exploring the cloud can minimize their risk, maximize their return on investment and accelerate performance results by relying on JDA. As the industry leader and a trusted partner, JDA is uniquely qualified to host and manage customers' software and associated IT resources — providing a "one-stop shopping" approach that simply makes good business sense.

Industry-Leading Capabilities — Now Available in the JDA Cloud

The world's leading manufacturers, retailers, distributors and 3PLs leverage the powerful capabilities of JDA Warehouse Management daily to visualize and control every aspect of their warehouse operations. JDA WM Cloud supports all the best practices and best-in-class workflows that underlie JDA Warehouse Management — developed based on JDA's work with hundreds of warehousing leaders.

For example, JDA Warehouse Labor Management, which shares a common platform and database schema, streamlines and automates workforce planning and scheduling, performance management

and employee engagement. It is also the industry's most robust solution for modeling engineered standards, allowing supervisors to quickly evaluate performance using advanced methods. JDA Warehouse Management also facilitates quality assurance and traceability. Some of today's biggest logistics challenges, including recalls and returns, are easily managed via this proven solution.

Via JDA WM Cloud, workflows can be customized to the way each company's warehouse actually works on an everyday basis, including specialized activities, workforce policies and inventory management guidelines. Early-warning systems and performance metrics minimize the element of surprise — and ensure that the entire warehouse stays on track. A role-based user experience shows each employee only the information that's relevant to his or her tasks, streamlining software interactions and eliminating redundancies.

By accessing the sophisticated business analytics in JDA Warehouse Management via the JDA WM Cloud, companies can empower their employees to tap into big data and make fact-based decisions — without the need for specialized training or external consultants.

In addition, the real-time, 24-7 availability of information provided by JDA WM Cloud reveals any risks of performance degradation, so environmental tuning can be performed proactively before impacts manifest themselves to end users.

Offering all the features and functionality of JDA Warehouse Management — via a user-friendly, cost-effective cloud approach — JDA WM Cloud delivers value faster than ever. As the software is up and running in days, not weeks, companies can begin to achieve performance results and a return on investment quickly, while also enjoying the long-term benefits of increased efficiency, visibility, speed and responsiveness.
