# AMS Azure Management Suite

Coretek Services' Azure Management Suite (AMS) is an industry leading Azure management tool. With the Azure Management Suite (AMS) from Coretek you manage your subscriptions, provide advanced reporting, and determine business unit billing details not found in the Microsoft Azure portal. The AMS portal can display real time consumption cost based on department and projects, enabling businesses to understand what Microsoft resources are being utilized and who they are assigned to in a simple graphical format.

Dashboard

View detailed costs by leveraging the logical groupings built into Azure such as resource groups and tags. Use these groupings to gain visualizations of your Azure spend. Track monthly trends and use the Coretek AMS to assist in detailed charge backs. Understand how much certain load cost or certain departments spend.

Search Utilization

Resource Groups
View detailed costs by leveraging the logical groupings built into Azure such as resource groups and tags. Use these groupings to gain visualizations of your Azure spend. Track monthly trends and use the CoretekAMS to assist in detailed charge backs. Understand how much certain load cost or certain departments spend.

Resource Categories
View detailed cost by category. This gives you visibility into how much has been spent on various categories such as networking, storage and virtual machine compute time.

Tags
View detailed cost by creating tags for items within the Azure portal. By creating cost centers tags in Azure for various workloads you will be able to leverage the CoretekAMS portal to groups costs for charging back those workloads to the appropriate departments. This allows for maximum flexibility in expressing your monthly costs.

Detailed Daily Meter Fees

Take a deeper dive into your daily spend for each Azure resource. Understand what the true costs are after your resources have been scaled. Leverage this cost information for future budgets and consideration when properly scaling your resources.

Utilization

Download

You may also download daily charges to Excel. This will create limitless options for you to find other ways to visualize your data or charge back to departments and cost centers.

Coretek Services is a Microsoft Cloud Solution Provider (CSP) that helps customers optimize their consumption cost by working with our customers to ensure they have the right Azure resource types assigned to their workloads, and assists with designing and implementing a cloud solution that meets their unique needs. CSP is similar to the Pay-As-You-Go subscription: there are no minimum purchases or commitments. CSP offers many advantages over Pay-As-You-Go Subscriptions and Enterprise Agreements, and in most cases, can be a more cost-effective solution. Your consumption is invoiced monthly based on actual consumption. Through Coretek's CSP and AMS portal, you will simplify your Azure and Office 365 billing process.

Why Coretek?

Our consultants have extensive experience, and are certified in Azure and Microsoft technologies

We are committed to client success - no exceptions!

Our strong partnership with leading cloud service providers is unparalleled

We provide an in-depth assessment of your current environment before recommending any products or services

Coretek Services is an industry leading IT professional services and consulting firm who specializes in delivering innovative, high-value solutions to our customers.
Our goal is to help clients achieve project success no exceptions!
