

# Dynamics Anywhere Logistics App

## Mobility Solutions for Microsoft Dynamics 365 for Finance and Operations, Enterprise Edition

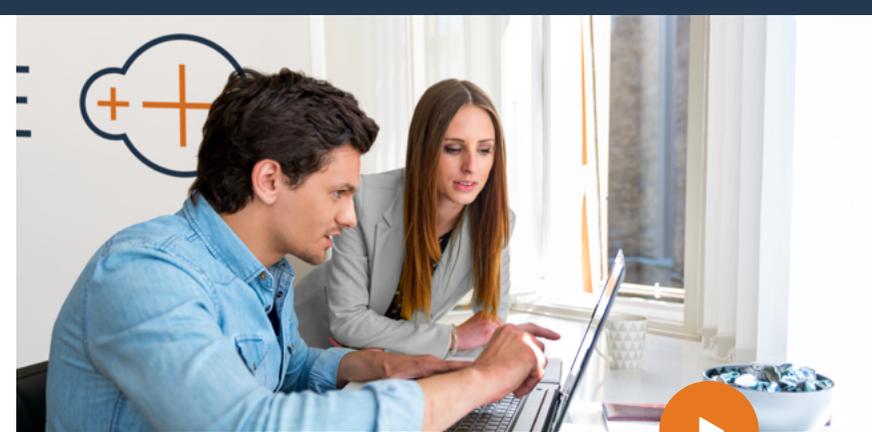

Dynamics Anywhere Logistics is a mobile app for Microsoft Dynamics 365 for Finance and Operations, Enterprise Edition that supports most of your warehouse daily processes. Instead of manually performing tasks such as receiving goods, picking sales orders, or moving goods, your warehouse workers can use a mobile device with barcode scanners to perform their tasks with optimal accuracy, speed, and consistency. They can now rely on a simple, easy-to-use, and powerful mobile app to perform their daily activities. Because Dynamics Anywhere Logistics integrates fully with Microsoft Dynamics 365, you can centrally control and direct logistics processes based on real-time information. You can also minimize paper-based tasks and associated costs for paper, ink, and printers.

Dynamics Anywhere Logistics is one of the enterprise mobility solutions provided by To-Increase for Dynamics 365 for Finance and Operations Enterprise Edition, which also include our cutting-edge Mobility Studio – our newest Mobile Framework which allows you to build, manage and maintain your Enterprise Mobility assets.

## Supported Processes

Dynamics Anywhere Logistics apps are offered in three different versions: Logistics Standard, Logistics Advanced and Logistics Production. In order to fit your specific requirements, we can also extend our apps in a very flexible way.

Receipt of Goods	Receive goods that have been ordered, transferred or returned with ease
Inventory Movement	Move inventory across locations without losing the trace of it
Inventory Counting	Have visibility in your inventory through spot counting or cycle counting mobile activities
Order Picking	Pick and Ship goods for transfer or sales orders
Stock Adjustment	Update the inventory adjustment journals
Item Inquiry	Inquire your inventory by location

## Benefits

- **Increase the productivity of warehouse workers and processes** by replacing inefficient and paper-based activities with mobile capabilities in an easy-to-use, full-featured mobile solution.
- **Ensure uncompromised accuracy** by letting workers scan and check items at the time of a transaction, so they can pick and move the right goods.
- **Reduce costs and save time** by efficiently processing each transaction as it happens, enabling workers to enter information directly into their mobile screens.
- **Improve inventory management** with real-time visibility of inventory data.
- **Deploy quickly and manage Dynamics Anywhere Logistics apps with minimal effort**, taking advantage of full integration with Microsoft Dynamics 365 for Finance and Operations Enterprise Edition and existing IT skills.
- **Exceptional User Experience** as our solution offers a totally new responsive user interface that fits all mobile screens and mobile devices independently of the operating system of browser used.
- **Choose the most affordable option that best fit your business** when it comes to mobile devices, operating systems, and versions of Dynamics Anywhere Logistics apps.

# Dynamics Anywhere Logistics App

## Features

### Connected business management

**Dynamics Anywhere Logistics has been designed for optimal support of your logistics business processes.**
