TO INCREASE

Dynamics Anywhere Mobility Studio
Mobility Solutions for Microsoft Dynamics 365 for Operations

Dynamics Anywhere Mobility Studio is a mobile framework that extends the mobile capabilities of Microsoft Dynamics 365 for Operations and enables people to execute business processes through their mobile devices. You can use the Mobility studio to create and customize your own mobile capabilities in just a few steps.

Being the next generation of To-Increase AX Anywhere mobile solutions, Anywhere Mobility Studio allows you to build mobile apps and make your data and ERP capabilities available anywhere, anytime, and from any mobile devices with a browser, such as smartphones, rugged mobile terminals, tablets, and laptops, running on any operating system.

Creating new mobile applications with Anywhere Mobility Studio is a pretty simple process when compared with other available solutions. It's a two-step process: You design and preview your applications, connect it to the Dynamics logic, and you're done.

Because Anywhere Mobility Studio is fully integrated with Dynamics 365 for Operations, you can without leaving the Dynamics environment easily modify existing mobile solutions to your requirements or create your own mobile tools. If you want to take advantage of mobility to increase the productivity of people and processes, Anywhere Mobility Studio provides a highly usable, practical way to gain mobile capabilities quickly, using existing skills.

Anywhere Mobility Studio comes with four workspaces that deliver the information needed for role-specific tasks. This gives you a more streamlined and transparent way of supporting core business functions such as administration, design, or monitoring, as well as the interactions and shares between roles.

Powerful, efficient mobility that advances your business

→ **Create and deploy your mobile solutions** quickly and with ease.

→ **Keep mobility flexible and secure,** without any need for middleware or device restrictions.

→ **Optimize mobility** for your most important business roles.

→ **Simply update your mobile solutions** when requirements change.
