

emnicon Processcenter

Fit Banking to your customers behavior.

Customer behavior is developing rapidly today. Provide flexibility at your customers touchpoints without losing control of quality.

Process customer information fast and secure

Create processes without taking legacy systems into account. Accept challenges from the market without sacrificing security. Take advantage of partners and enhance your own processes with those 3rd party services.

Banking processes in a open and secure way

- Customer behavior constantly creates new challenges for banks.
- Transforming legacy systems takes a long time and is expensive as the world keeps spinning.
- We bridges the gap between your customers behavior and your legacy systems.

Rapidly respond to new challenges

- Adjust the process prior adjusting your organization
- Keep track with competitors
- Test changes directly with customers

Decide based on business requirements. Not on the technological constraints.

Rapid "Go to Market"

- Cloud based technology offers global opportunities
- Processcenter is scaling immediately with your requirements on Azure®
- Azure® offers perfect security and GDPR compliance

Scale your banking business beyond current limits.

Open for FinTechs

- Create new alliances to grow.
- Focus on business goals.
- Processcenter provides Space for Your Ideas and connections to your Partners.

Enhance customer experiences with the potential of new partners.

The emnicon Processcenter perfectly combines customer and employee behavior and makes the banking business faster, more convenient and more flexible. When you combine the emnicon Processcenter with your core banking system, you can implement almost anything.
