

Accelerating Digital Transformation for Industrial Equipment Providers

A proven approach for successful
design, delivery, and commercialization
of industrial connected product solutions

Start Faster. Go Further.

The Modern, Open Approach to IoT

Enterprises are demanding flexibility for building unique business value on an open, adaptable IoT infrastructure

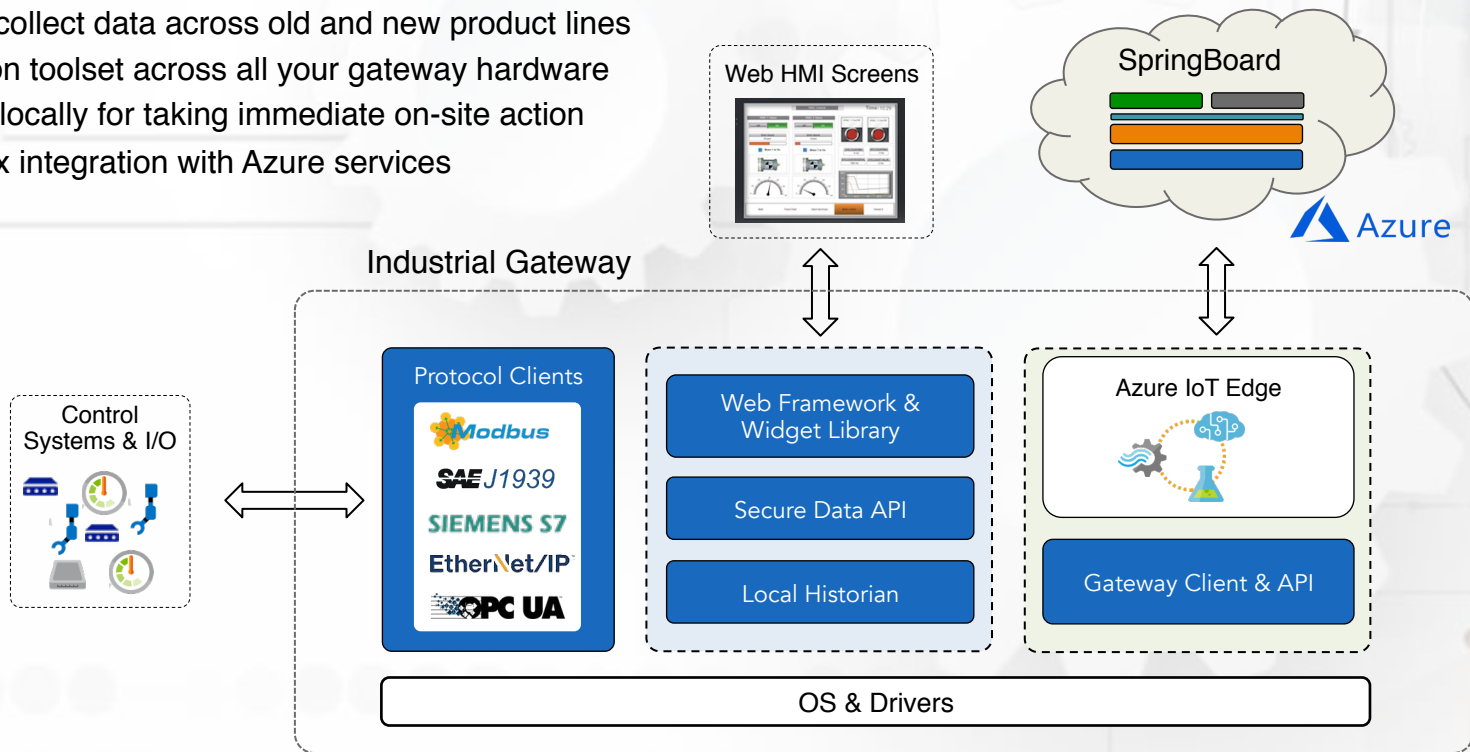

- Open systems provide the Agility & Control of “Build” with the Speed & Simplicity of “Buy”
- Bright Wolf provides a proven, enterprise-class IoT infrastructure for leveraging Azure services edge to cloud
- Use standard skillsets and your preferred tools for creating differentiated connected products and services

GearBox: Flexible Intelligence at the Edge

Where the “Real World” Meets the Digital Enterprise

- Connect and collect data across old and new product lines
- Run a common toolset across all your gateway hardware
- Process data locally for taking immediate on-site action
- Out-of-the-box integration with Azure services

The Practical Approach to Digital Transformation

Bright Wolf has almost a decade of experience as a system integration and technology partner for Fortune 1000 industrial equipment providers seeking digital transformation through adaptable connected product solutions

Vertical solutions include Manufacturing, Oil & Gas, Healthcare, Agriculture, Smart Building, Cold Chain Transportation, Heavy Equipment, and other industries.

"We chose Bright Wolf for their experience at the industrial edge and commitment to rapid delivery. They were able to quickly understand both our business and technical needs, and helped us build a flexible connected product solution, based on Microsoft Azure, and designed to give us a strong competitive advantage going forward."

- Daric Schweikart, Vice President Information Technology

"Caterpillar needed a flexible, intelligent edge solution that allows our systems to be customized in the field by our dealers and partners and customers. We chose Bright Wolf for their deep experience delivering customizable solutions at the industrial edge, and they've been a steadfast solution partner every step of the way."

- Merritt Callaghan, Caterpillar Inc.

"We've been able to move incredibly fast thanks to Bright Wolf's experience with embedded systems, industrial protocols, and real-time operations at the edge. Their understanding of both the technology and business challenges of industrial IoT has been tremendously valuable."

- Jeroen Groener, Data Analysis Manager
