

CloudCare

Manage Office 365 users in your IT-environments

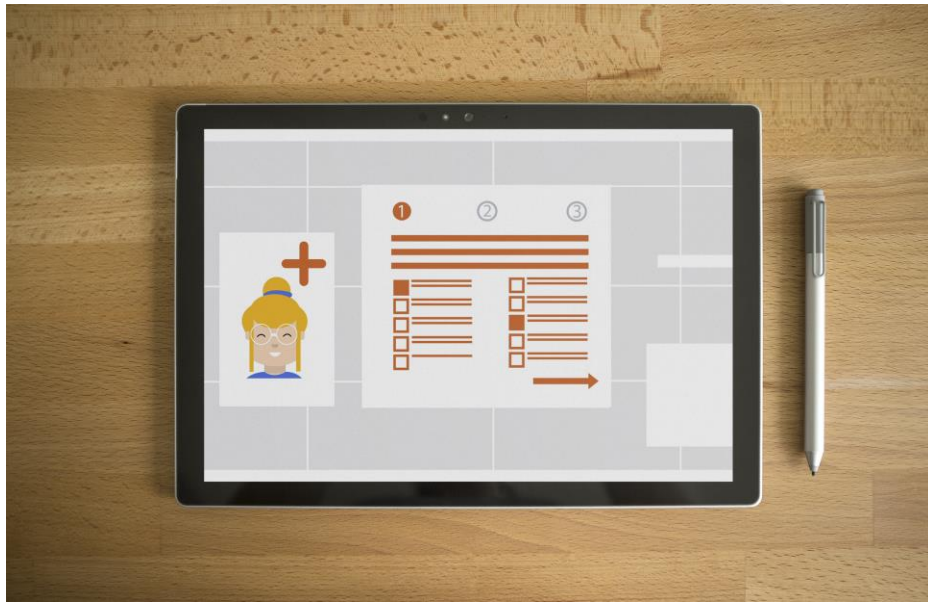

<https://www.youtube.com/watch?v=nLIAeSws1mk>

Why CloudCare? What is it?

- Necessity of simplification
- Automation of every day actions
- Extra layer above Office 365 admin
- Connecting different IT-environments
- Build on requests of customers

4 big feature clusters

Employee management system

Manage your users in different IT environments using automated processes. Adding, copying, editing or deleting employees can easily be done by means of wizards.

Reports

The Office 365 admin portal contains very few reporting options. CloudCare expands these options and also brings together data from different IT environments.

Role management

CloudCare uses different user roles. For example, you can give a HR employee or a local IT employee limited admin access in a secure environment to manage the users.

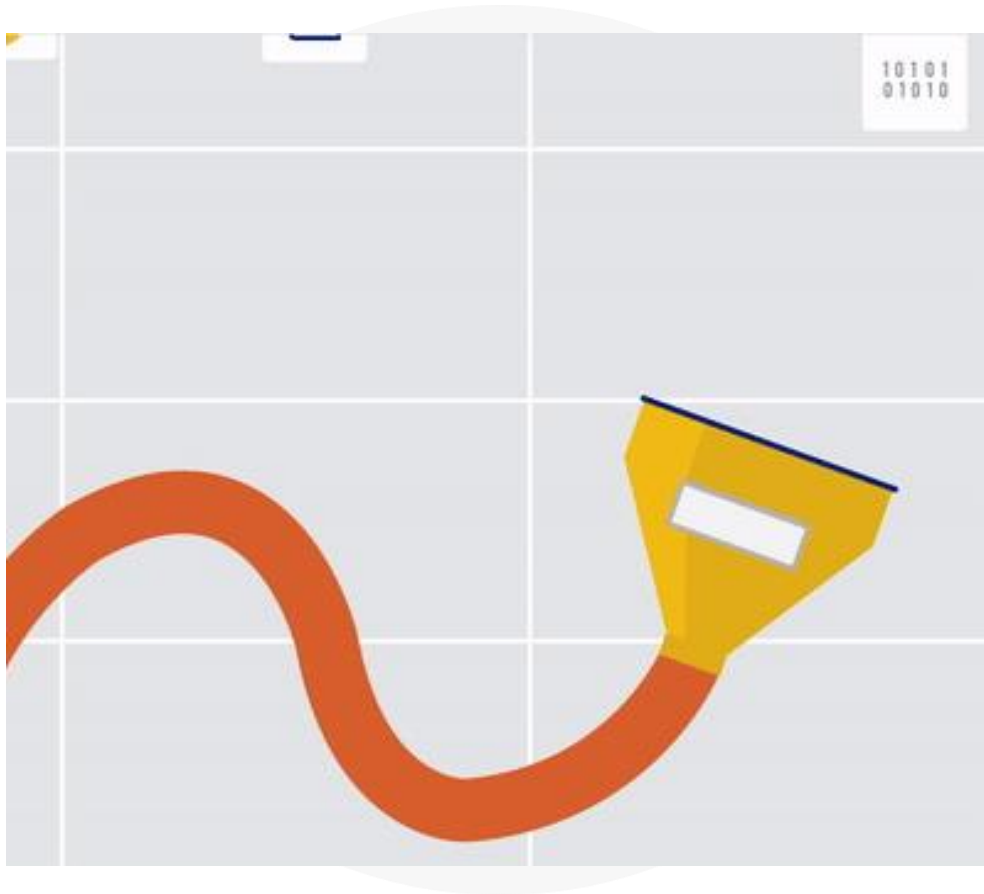

Working hours

The employees can only send or receive emails on any device within the selected time frame.

Reports

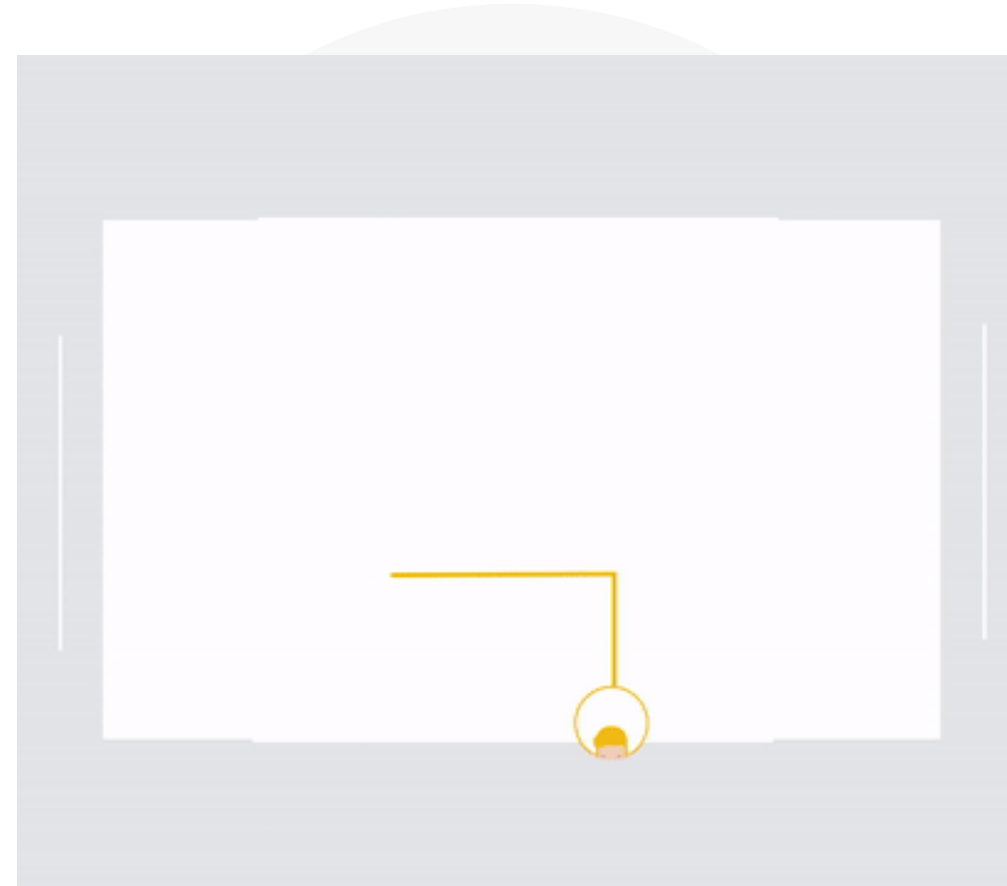

- Added reporting possibilities such as:
 - Overview of all the users with their current licenses
 - List of all the forwards active in the organization
 - List of all the last password changes
 - List of last logon time

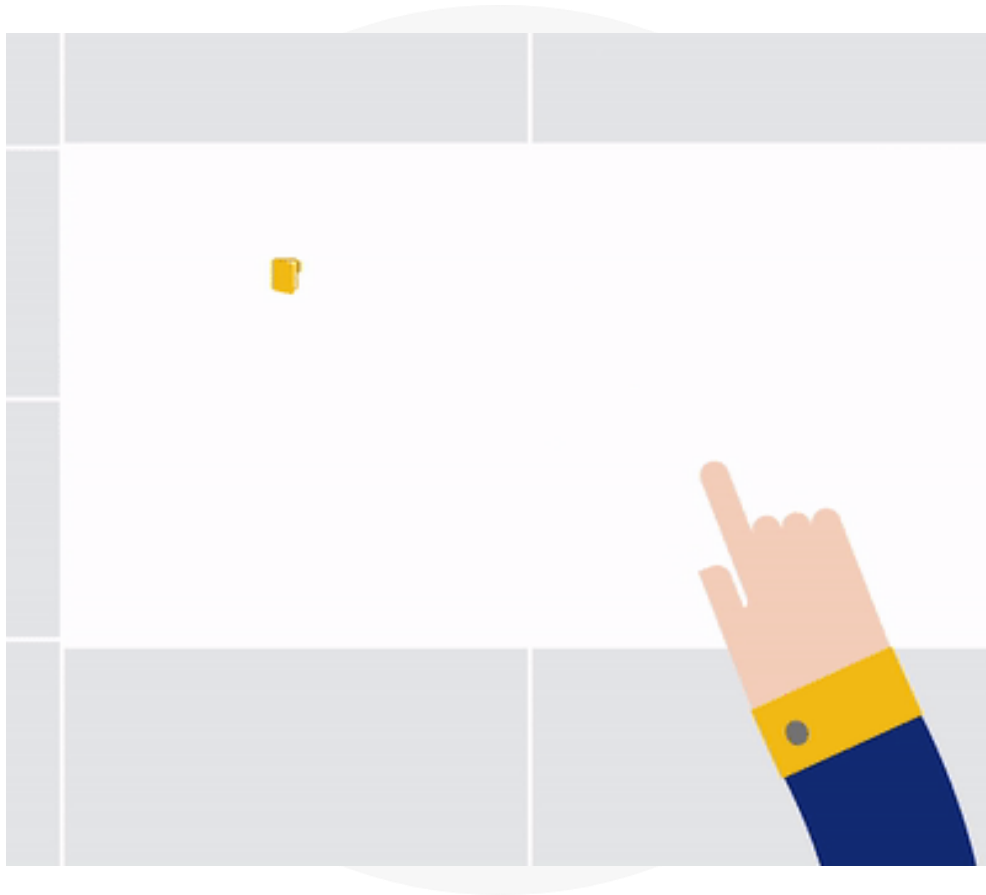

Role management

- Manage access to the cloudcare tool
- Different roles
 - IT-manager
 - IT-employee
 - Only access to users from a certain country for example
 - HR employee
 - Add new users for example
- Relieve IT-administrator's work

Employee management system

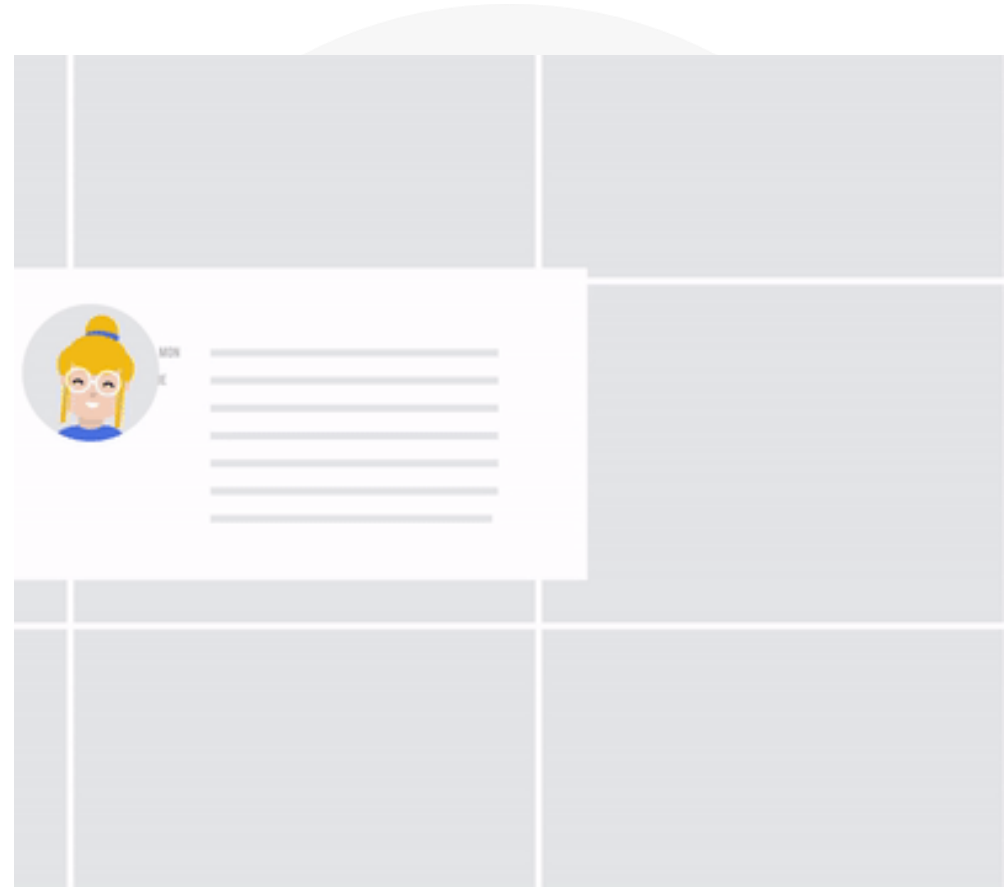

- Basis of CloudCare
- Automation day-to-day tasks
- Wizards
- Reduce IT-admin workload
- Complete management users
- Full synchronisation with local AD

Working hours

- Restrict access to corporate e-mail within selected timeframe
- 5 easy steps to set up a working hour schedule
 - Name the working hours schedule
 - Block send and/or receiving e-mails
 - Set the specific timeframe
 - Select the users / groups
 - Choose to activate or deactivate the schedule

Request a free trial

- Click on the link
- Fill in the form with your contact details
- A CloudCare developer will contact you
- Get a demo of the most important features
- Test the tool yourself during a free trial (1 month)
- Link:
