

ABB ABILITY™ VELOCITY SUITE

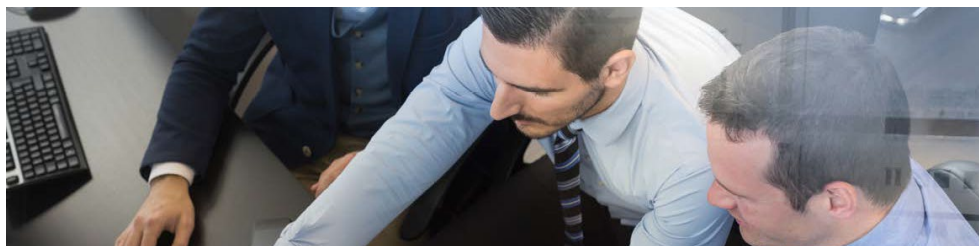

Accelerated time to insight for today's data-driven decisions

The complex nature of today's energy markets makes the process of gathering, modeling and analyzing data a monumental, resource-intensive task. Energy executives, planners and analysts need to constantly evaluate energy markets

What is ABB Ability™ Velocity Suite

Velocity Suite provides energy executives, planners and analysts the ability to evaluate energy markets to understand the effects of tightening regulations, resource constraints, market volatility, environmental pressures, and the industry dynamics across commodities using a single integrated solution.

Why customers use ABB Ability™ Velocity Suite

- Access to various market intelligence without having to jump from solution to solution
- Analytical tools to break down and assess complex and data-intensive problems
- Access to an extensive breadth on energy market data leveraging pre-built data relationships

Broad Data Coverage

- Easy access to data via easy-to-use query and analytics tools
- Any new essential source emerging, will be added, making Velocity Suite the energy industry's most comprehensive database

Always up-to-date with the market

Data Mining

- Quickly retrieve all data and geographic details available for a company in each sector of the energy industry.
- The DataMiner delivers faster and more consistent results

Timely, informed decisions

Geospatial Analysis

- Market prices, load, services - visualize pricing locations
- Time series analysis – animated time-lapse data maps spot trends
- Heat maps visualize analysis

Highly Accurate

Box 15: Insert 25 – 35 word customer testimonial

- Customer Name, Title, Company
