

# Accelerator for Credit Union Operations

Executive Dashboard for Analyzing Lending Performance, Trends, and More

**The Credit Union Accelerator provides key metrics to understand the health of the credit union, as well as trends and analysis in member, branch, and lending performance.**

Information Builders' Accelerator for Credit Union Operations provides executives and operations managers with key metrics to understand the health of the credit union, and the underlying trends and analysis in member, branch, and lending performance. Its pre-built content includes an executive dashboard, data description, sample data, and a set of InfoApps™, providing key metrics and analysis, as well as a report generator to enable non-technical users to create their own dashboards and tabular reports.

## Key Performance Indicators

- Loan-to-share ratio
- Share, lending, and member growth rates
- Balance trends and analysis
- Branch geolocation and asset distribution

## Business Benefits

The Accelerator for Credit Union Operations provides the current measurement and analysis of loan and share production necessary for profitable growth to manage debt and understand the impact of exogenous factors such as interest rates, market share, and the economy. Understanding current performance in the context of the credit union's historical trends and geographic distribution helps shape the direction taken by credit union leadership.

**An Accelerator is a set of pre-configured analytical capabilities designed for specific users in an industry. Accelerators give you a jump-start to extend and customize these capabilities for your organization. They run against sample data or with your own data.**
