

SMART Basic Financials

A simplified User Experience for Microsoft Dynamics 365 Business Central Basic

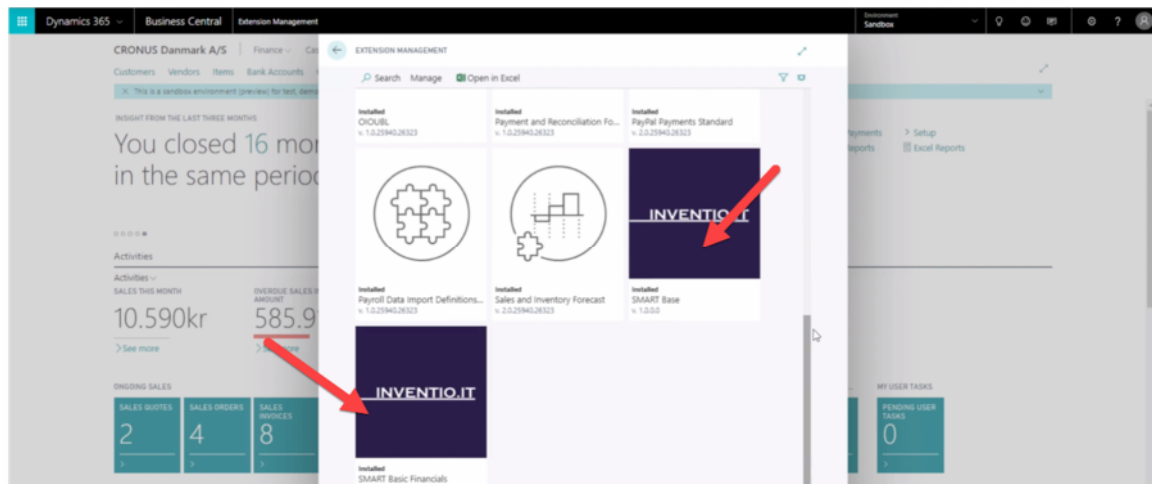

SMART Basic Financials allows smaller companies to get started in an extremely clear and simple way. Menus and pages are customized so that only the most necessary fields are displayed, as for example: basic finance functions, simple Customer and Supplier management, and very simple storage.

Let's get started.

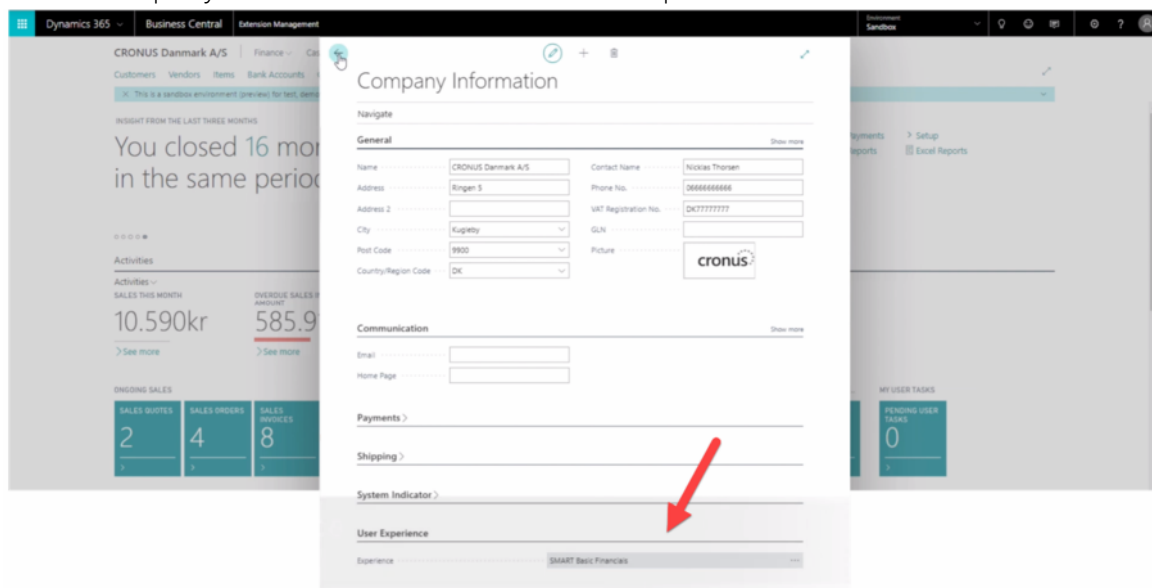

1. Go to the **Extensions** page.

2. Install "SMART Base" and "SMART Basic Financials"

3. Go to Company Information and change "User Experience" to "SMART Basic Financials"

4. SMART Basic Financials is now ready to use.
