**TAKE
BETTER DECISIONS**

## Optimized Finances

mymetrix.cloud gives you access to a state-of-the-art data infrastructure, with no integration costs, via an OPEX subscription that can be cancelled at any time.

## Optimized Governance

mymetrix.cloud offers a single, integrated version of your data. We run it, monitor it and support it in a secure cloud environment. No more issues with the durability of your applications.

## Optimized Teams

Empower yourself with access to current, comprehensive, validated and coherent information. Your employees can now devote their time and knowledge to high value-added activities not data wrangling.

# Who are we?

mymetrix.cloud gives SME leaders access to the kind of state-of-the-art tools that are used in large corporations. With these tools, you can now improve your management process efficiency, accurately measure and analyze real data and build forecasts and budgets with more precision for your finance, accounting, sales, marketing and operational activities.

mymetrix.cloud is the product of experience acquired over the years by our team members in the creation of innovative, scalable business solutions that we have deployed for many clients.

Don't want to take any risks? Have a restricted budget? Entrust us with your needs, and we'll deliver the solution that suits you best.

# What do
# users think?

Given the volume of raw data that we needed to process, preparing our weekly KPI reports for management was both burdensome and time-consuming. The application allowed us to automate the production of these reports while eliminating the need for a senior analyst who would be wasting time on low-level data handling tasks.

*IT Director*

We were looking for a provider that could automate the production process of our monthly commission report. mymetrix.cloud's turnkey approach allowed us to focus on user needs while minimizing our dependence on the IT department. The mymetrix.cloud solutions are managed by a competent team committed to the quality and sustainability of their applications.
