schedulePRO

Complex Scheduling Made Easy

The Scheduling Software for Oil & Gas and Petrochemical Organizations

SchedulePro is a Software-as-a-Service (SaaS) based Workforce Scheduling Software delivered on Azure. Designed for Oil & Gas and Petrochemical organizations, SchedulePro empowers customers to adhere to their complex compliance requirements (e.g. Fatigue, Industry, Union/Non-Union, State/Province, In-house rules) while simultaneously optimizing their manpower for corporate objectives such as Safety & Fairness, Labor Cost Reduction, and Proficiency Equalization.

Automated Scheduling based on Your Policies and Procedures

No more juggling with multiple systems, spreadsheets, and papers. Create your monthly schedule with 3 clicks within 30 seconds. Based on your desired requirement coverage, scheduling workflows, and company policies, you can make assignments and changes with ease and confidence.

Compliance Monitoring, Enforcement and Continuous Improvement

No more second-guessing possible rule violations and struggling with work rule audits. With our robust rules engine, users are made proactively aware of the impact of their scheduling actions and are provided with meaningful suggestions to reduce violations (e.g. PHMSA/CEPA, API RP 755, federal & local rules and union/non-union rules and more.)

Extendable Platform to meet your End-to-end Needs

Scheduling is only one part of the equation. Other processes such as leave management, time & attendance, payroll, budget are all integral parts of operational excellence. With our add-on modules and integration capabilities through API and CSV file transfer, you can minimize the amount of time and effort required for data re-entry and reconciliation.

Proven and Trusted among Industry Leaders

Shell Oil
- All 9 refinery sites live in **under 12 months**
- **5,000 employees** using SchedulePro
- **$3M saved** per year in time and cost saving
- Selected among **25 prospective vendors**
- First oil company to fully comply with **API RP 755 Fatigue guidelines**

" SchedulePro was able to meet demanding timelines, provide user-friendly training materials and responsive post-implementation support."

Larry Heasley , HR Business Opportunity Manager, Shell

Boardwalk Pipeline
- Reduced time spent on staff scheduling **by 50%**
- Implemented and live **within 3 months**
- Complied with **PHMSA** and **Hours of Services Rules**

schedulePRO

Solution Overview

No IT demands

- API RP 755 Fatigue Guidelines (current and version 2)
- Control Room Management Regulations (CRM)- CFR 49 192 and 195
- OSHA
- All schedule types (8,10,12-hour, 9/80 shifts)

What Make SchedulePro Unique ?

Flexible to address the needs of multiple operating units with different policies and procedures.
Many vendors apply a one-size-fits-all approach to compliance. We understand that compliance means different things to different parts of your organization down to a site level. SchedulePro is designed to address your unique complexity.

Proactive Compliance and User Empowerment
Traditional Workforce Management (WFM) software focuses on auditing your schedule for violations after they have occurred. SchedulePro educates users on the impact of their decisions and provides suggestions to proactively address issues before they occur.

Consultative approach to Implementation
Many WFM implementations fail because vendors underestimate the complexities that O&G and Petrochemical organizations face. SchedulePro invests time upfront to ensure all requirements and complexities are understood and agreed upon before kick-starting any project. This has allowed us to roll out system go-lives efficiently - saving your organization time and money.
