

AttachmentExtractor

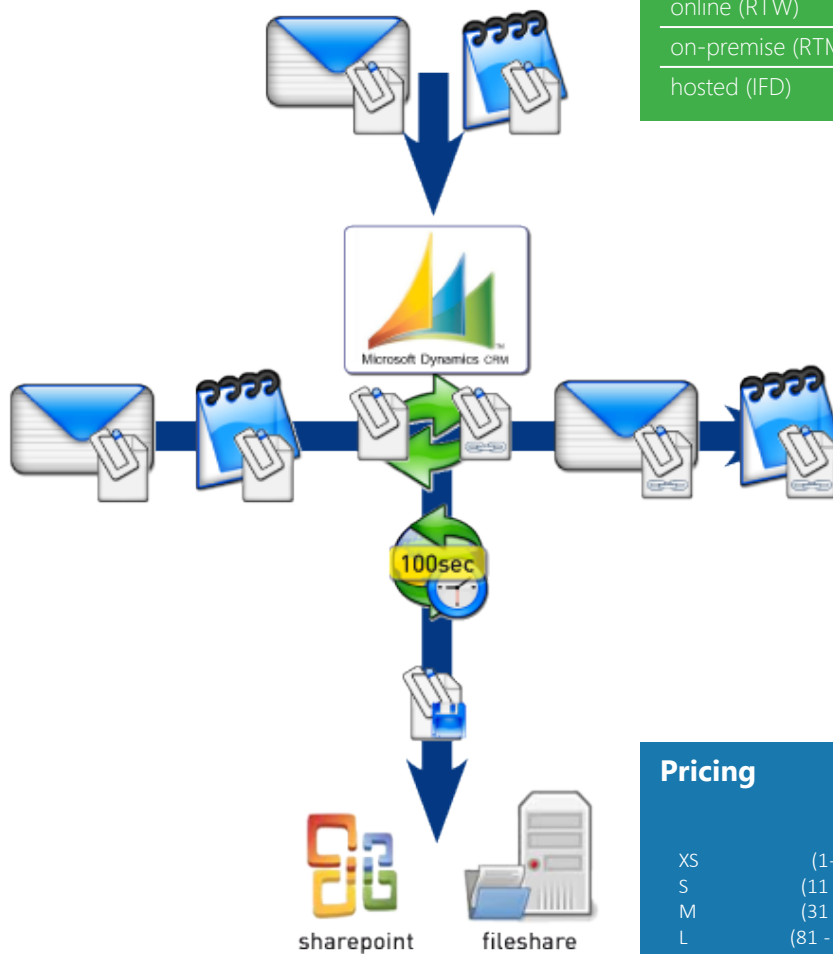

for MS Dynamics CRM

AttachmentExtractor moves attachments from within CRM to either a SharePoint location or a fileshare. Therefore, it helps to save precious database space in CRM. Furthermore, the addon enables various indexing & search options via SharePoint and the Microsoft Search Server functionality.

How it works

- Extraction of attachments and documents from CRM to SharePoint or a fileshare
- Replication of data and sensitive documents
- Reduce cost of online storage - CRM vs. SharePoint
- Look & Feel: No difference for CRM users
- Indexation and search features
