

SEE-WHAT-I-SEE REMOTE ASSISTANCE

Instant and seamless hands-free video calls for remote support and remote audit scenarios within and between corporations

Cost and time-consuming support, audit and training processes within & between companies are revolutionized by xAssist. This innovative augmented reality solution helps enterprises to significantly speed up reaction times and reduce travelling for experts.

With xAssist the remote expert can see exactly what the person on-site is seeing and as a result is able to provide instant, targeted feedback and instructions by video, audio, text, markers, and document sharing. The exclusive possibility to have multiple users in one call, allows for verified external experts to take part in a call even if outside of a company network.

xAssist can quickly be deployed on premise or in the cloud. Except for network connectivity, there are no further requirements relating to infrastructure.

Real-time remote...

- ...worker support
- ... customer support
- ...dealership support
- ...supplier audit
- ...franchise collaboration
- ...instructions
- ...group trainings
- ...and many more!

Core Features
