The last line in email security, protecting businesses using Microsoft Office 365

Microsoft

mailguard 365

BETTER TOGETHER

MailGuard 365 was built by MailGuard with the team at Microsoft to specifically protect Office 365 users. It combines 18+ years of specialized email security expertise from MailGuard, with the best of Microsoft Azure, and is exclusive to the Microsoft marketplace.

EMAIL SECURITY LIKE NO OTHER

Single-click activation

Activated with your Microsoft tenant ID (Directory ID), your organization can get started with MailGuard 365 protection with a single click, stopping advanced criminal intent email threats immediately.

Stop criminal intent emails

MailGuard 365 re-scans emails when they reach inboxes (and after the Microsoft Office 365 security stack), stopping dangerous email threats like phishing, spear phishing, ransomware and CEO fraud (BEC) attacks that can devastate your business.

No end user training

Easy for users, MailGuard 365 works in stealth within the native Office 365 environment, moving threats to the users junk folder, meaning there is no additional training required.

It makes life simple for IT admins too, with no set-up headaches or journaling to configure.

Evidence-based reporting

Unique 'last line' implementation, means MailGuard 365 is the last to inspect email when it reaches an inbox, allowing evidence-based reporting that demonstrates its stopping power, complementing upstream security services like the Microsoft 365 security stack and any third-party email security vendors.

WHAT OUR CUSTOMERS ARE SAYING

"Just like every other organization, we have happy clickers. You can't stop or track what each employee is clicking every minute of the day.

The best way to prepare is with layered-email security. You must have the right protections for peace of mind. MailGuard does this for us."

— HEAD OF IT, CAPITOL HEALTH

mailguard 365

MailGuard 365

A world-first solution that is collaborative by design, MailGuard 365 scans for new criminal intent threats, inspecting email records after they have passed through your Microsoft Office 365 security stack and any other third-party email security vendors. This enables evidence-based reporting, demonstrating the additional threats stopped to protect your business.

STOPS UNWANTED EMAIL THREATS

PHISHING
Protect your data, passwords, banking and other sensitive credentials that are the target of attacks by cybercriminals.

CEO FRAUD (BEC)
Stop targeted attacks impersonating C-level leaders and other people of influence within your organization.

RANSOMWARE
Malicious payloads can prevent access to systems and data, demanding ransom payments in return for decryption.

SPEAR PHISHING
Targeting key individuals, cybercriminals use social engineering to design fraudulent emails aimed at extracting sensitive information and funds.

WHY MAILGUARD 365?

Microsoft Office 365 users are prime targets for cybercriminals, with nine out of 10 cyberattacks delivered by email. MailGuard 365 makes life safer and easier for those businesses and their users.

2-48 HOURS AHEAD
Speed is the new currency, and MailGuard 365 leads the market by stopping threats 2-48 hours ahead of rivals. MailGuard 365 leverages 18+ years of specialized IP from MailGuard, stopping advanced criminal intent email threats like phishing, CEO fraud and ransomware.

MULTI-LAYERED PROTECTION
Experts agree that a multi-layered approach to email security is required. Gartner reports that *'35% of client organizations that move to Office 365 are supplementing its natively available email security capabilities with a third-party*

product.' With its unique last line implementation, MailGuard 365 allows organizations to take advantage of upstream solutions, like the Microsoft security stack or third-party vendors, with the added power of a specialist email solution re-scanning email as a last line of defence.

EVIDENCE-BASED REPORTING
Its unique architecture enables compelling evidence based reporting demonstrating the stopping power of MailGuard 365, and the additional threats that have been defended.

EASY FOR USERS AND ADMINS
Operating natively in stealth within the Office 365 environment, means there is no training required for end users, and getting started for admins is super simple, with just a single click.
