

ePass FIDO Series Security Keys

FEITIAN provides a series of FIDO security keys with multiple interfaces, including USB-A, USB-C, NFC and BLE. Different models of products meet almost all customers' requirements in the authentication world.

By adding fingerprint technology to our FIDO2 security keys (K26/K27/K33), FEITIAN is able to offer a convenient, and ultimately more secure password-less experience. FEITIAN BioPass FIDO2 Security keys allow you to carry your credentials with you and safely logon to Microsoft personal account and Microsoft services—enabling the ability to logon without a username and password, just plug our BioPass in to your computer and verify the fingerprint.

The FEITIAN FIDO security key is supported many most popular online services, including Microsoft account, Azure Active Directory, Google, Facebook. collaboration with Microsoft on the FIDO2 biometric password-less solution
