MobileNAV is
THE ULTIMATE mobile solution for
Microsoft Dynamics 365
Business Central

MULTISOFT*innovation*

MobileNAV

When we started to develop MobileNAV, it was a challenge to make a much better mobile app for out-of-office activities than the existing ones. We knew the needs and we had the technologies to assemble a comprehensive solution. With time we've realized the features are forming themselves to bundles for general and specialized applications. Five business specific solution were born with many unique features.

MobileNAV is a well-known solution in the Dynamics ERP world. It has been on the market for six years, sold by more than 200 partners and used by more than 5000 users worldwide.

For Sales
For Services
For Warehouse
For Production
For Project

MobileNAV is THE ULTIMATE mobile solution for Microsoft Dynamics 365 Business Central / NAV. It ensures online and offline work for typical out-of-office ERP activities, like sales, service and project management. Furthermore, it guarantees real-time tracking of your business for example in the warehouse and production-related workflows. You can build up your own mobile application without mobile development knowledge. Each field and functionality is configurable inside ERP, so you can adopt custom modules and even specialized vertical solutions. Simply said, MobileNAV is a new user-interface for Dynamics ERP, optimized for smartphones and tablets. You can access your real-time data and functions similarly to desktop clients. The offline capability allows continuing your work even without an active network connection.

Total Control On Field Service Activities

MobileNAV for Service is an outstanding solution for Field Service and Spare Part Logistics. Many automatic functions prevent delay of delivery and chaos of inventory management. It provides GPS Tracking and map integration for effective work.

For Service

- » GPS Tracking With Map Integration
