

# Bosch Trac360Logi

Logistics tracking solution with condition monitoring

Bosch Trac360Logi is a an innovative IoT solution that enables customers to perform real-time tracking of their products and shipments, using integrated technologies like GPS, Sensors and IoT.

Providing end-to-end product traceability and visibility, Trac360Logi increases customers satisfaction, reduces unforeseen costs, retains product shelf life throughout its journey from factory to customer.

### Provides comprehensive visibility and transparency in transit

Enables end-to-end situational awareness by labeling and tracking shipments and associated carriers from factory through delivery to end-customers

### Real time traceability and condition monitoring of goods and carriers

Optimizes efficiencies by track live location, condition, and spoilage of condition-sensitive cargo or products across any carriers

### Integrates with IoT and enterprises systems

Provides an integrated, cloud-based dashboard that aggregates data from multiple disparate systems to improve real-time insights and decision-making

## Precisely tracked over 30000 trips

**Bosch TraVis – Transport Visualization System** was developed to solve the challenges of distributing parts from Bosch plants in India to local distributors and automotive OEMs. There were numerous third party logistics providers. It digitized the dispatch and shipment process, efficient planning of trips and routes and tracking shipment through GPS and getting notifications on key milestone deliveries. Digitized proof of delivery enabling faster processing of logistics' settlements.

## About Bosch

The Bosch Group is a leading global supplier of technology and services. It employs roughly 402,000 associates with operations divided into four business sectors: Mobility solutions, industrial technology, consumer goods, and energy and building technology. As a leading IoT company, Bosch offers innovative solutions for smart homes, smart cities, connected mobility, and connected manufacturing. It uses its expertise in sensor technology, software, and services, as well as its own IoT cloud, to offer its customers connected, cross-domain solutions from a single source.
