# Surveil SLIM — Your Microsoft cost optimisation tool for Security, License and Identity Management

Surveil SLIM is a tool to give you insight into your operational spend and to reduce your Cost of Ownership. SLIM gives transparency to your Microsoft bills and provides complete Business views of Azure, Azure Stack and Office 365 spend and usage. View your costs and identities in the business language you speak. Manage your security, licenses and identity – all within one solution, in a single pane of glass.

Surveil SLIM was developed as a Microsoft specialist tool for planning, budgeting and reporting, enabling you to manage your total costs across Azure, Azure Stack and Office 365. Designed around business consumption to help you maintain your budget, Surveil SLIM lets you to maximise your ROI on your Microsoft spend. Align your spend to business billing categories you assign based on the way you manage your budgets and leverage Microsoft pricing optimization for effective cloud cost management. Gain knowledge of under-utilized Azure resources or Office 365 licenses and re-assign them with ease. Automate Identity and device management and stay on top of security across your Hybrid estate. Plan your future budgets with the support of retrospective analysis on historical data and pre-consumptive cost analysis. Understand your business resource use, actual costs and operational spend. Take advantage of Surveil SLIM's embedded BI Analytics engine's extensive tables, graphs and reports to gain even more insight to your business.

## PEACE OF MIND

BI Analytic

\$6

- Minimise waste, optimise your ROI and stay within budget
- Reduce security and financial risk
- Simple and secure tooling to manage costs, licenses and identity in a single pane of glass

## **KNOW YOUR SPEND**

- All costs presented according to your business budgets—by user, division, cost code, department etc.
- Visibility to cloud, Azure and Licensing resource use and operational expenditure
- Office 365 license management with recommended licensing options

## TAKE CONTROL

- Manage your total costs across Azure, Office 365 and on-premise
- Receive alerts and recommendations on spend, Licensing options and security
- Automate the management of your joiners and leavers

Survei

# **PLATFORM CAPABILITIES**

Core Capabilities across Azure, Office 365 and Hybrid on-premise environments\*

#### • License Cost Visualisation

View License cost by department, cost centre, location, user and license—or any other custom view

#### • Cost Saving

View recommendations on cost savings with ability to automatically take action

- Identify Threat Management and Compliance
  Consolidated view on identity and risk events—Azure and on-Premise Active Directory management
- Central Alerting

Trigger alerts from events and notify on a variety of communication platforms

• Al Decision Engine

Based on any trigger events you choose, make a multitude of custom decisions across your technology

Hybrid Benefit Tracker

Track the use of your hybrid benefit use for Windows and SQL

• Application and Feature Use

Display licensed application usage and waste

Purchase Planning

Know the best licensing options to purchase with our planner

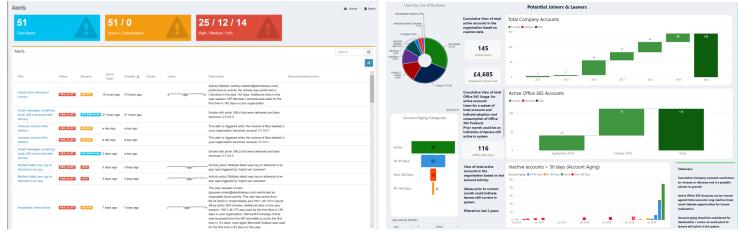

#### Joiner Automation

Allocate licenses to new joiners based on functionality required—automated and optimized licensing

#### Automation

Automatically deallocate licenses from employees that are inactive

\*Note—needs to have Surveil Core HCM installed

# **AZURE AND AZURE STACK FEATURES AND BENEFITS**

- Cloud-hosted Resilient Service
- Supports Azure Active Directory
- User Management—Azure AD integration
- Azure Metre categories—12 month reports
- Business Categories—12 month reports
- Export reports vis CSV
- Cost Reduction AI Engine—11 categories
- New Services alerts
- Monitor creation of external facing IP addresses
- Resources Planner for monitoring of assigned tasks
- Yearly Cost Forecast
- Custom Tags
- Minimum 12 month history
- Business budgeting-based rules

- Custom categories
- Visibility to Azure Metrics
- Rules automatically applied to nested resources
- View costs on a daily basis
- Customised currencies
- Detailed breakdowns per business categories
- Azure technical categories breakdown
- 8x5 support
- PAYG subscriptions
- Enterprise Agreement (EA) subscriptions
- PowerBI reporting content pack
- Configuration training
- Third party API integration
- Monthly Azure Bill costs
