Welcome

Welcome to this companion guide for MS Dynamics 365 Contacts/Leads synchronization to MailChimp. Within this guide, you'll be shown how to use Sysfore PROMOT 365 App in MS D365 instance.

About Sysfore

Sysfore is the first Microsoft Gold Partner on Azure and one of the early AWS certified partners in India, with a dedicated focus on modern apps and cloud managed services. With rich breadth and depth of experience and expertise in enabling customers onto the cloud-based offerings, Sysfore has delivered over 100's of engagements for customers to ensure their success. Sysfore's strong product engineering team focus on developing dynamically scalable cloud-ready web and mobile apps. Sysfore Cloud Managed Services offers 24*7 support services for subscribed customers, for managing their various cloud infrastructure. Sysfore uses Microsoft Dynamics 365 to help customers grow their business multi-fold by effectively positioning their offerings coupled with the right value.

Introduction

This App is used for syncing newly created and updated MS D365 Contacts/Leads to MailChimp List with the scheduling process. Immediate sync of D365 Contacts/Leads can occur during the action of Sync to MailChimp in each record-wise.

4. Subscription Activation

Subscription activation is available in D365 configuration page. Two types of activations are available. They are Trial and Subscribe.

Below screenshot describes about subscription activation.

4.1 Field Explanation

- | | |
|-----------------------------|---|
| Customer Information | : First Name, Last Name, Email and Phone No. |
| No of Users | : The total number of users who are accessing immediate sync process |
| Valid From and To | : Between "from" and "to" date, the license validity will be available. |
| Days | : Total number of license validity days |
| Status | : There are 3 types of License Status. Below is the explanation about status. |
| 1. Pending | : During Subscribe and Renewal activation request, the status will be pending. |
| 2. Activated | : Once the license is activated, the status will be activated. It means that the sync process can be able to access. |
| 3. Expired | : License validity expiry status. |
| Subscription Key | : Subscribe or renewal activation key must be pasted here for the activation process. |
| Process Buttons | : There are 4 types of process buttons. Below is the explanation of process. |
| 1. Trial | : 30 days validity from "valid from" date. |
| 2. Subscribe | : Default 1 year validity from "valid from" date. Otherwise request for particular date range. |
| 3. Renewal | : Once the validity expires, customer can request for renewing the license. |
| 4. Activation Key | : Once the license is activated, the activation key will be sent to the customer mail Id. This key should be pasted to the subscription key field and activate the license. |

4.2 License Activation Steps

4.2.1 Trial Activation

Customer details are required for license activation. Default valid from is current date. The customer can change the valid from date. When processing trial action, valid to, number of days and status will be automatically displayed.

Below Screenshot explains about Trial activation.

Subscription Activation

Customer Details		Subscription Details	
First Name *	Joyel	Valid From	14-Aug-2018
Last Name *	Jack	Valid To	dd-----yyyy
Email *	joyel@someone.com	Days	
Phone No *	009162364879	Status	
No of Users *	1	Subscription Key	

Trial Subscribe

The above data is enough for trial activation. Once the Trial is activated, the data will be as shown below.

Subscription Activation

Customer Details		Subscription Details	
First Name *	Joyel	Valid From	14-Aug-2018
Last Name *	Jack	Valid To	13-Sep-2018
Email *	joyel@someone.com	Days	30
Phone No *	009162364879	Status	Activated
No of Users *	1	Subscription Key	

Renewal

4.2.2 Subscribe Activation

Subscribe activation can occur in two ways. Before Trial, one can directly activate the Subscription or in case of expiry of Trial license expired, subscription can be done. Below screenshot describes about this.

Subscription Activation

Customer Details		Subscription Details	
First Name *	Joyel	Valid From	14-Aug-2018
Last Name *	Jack	Valid To	13-Sep-2018
Email *	joyel@someone.com	Days	30
Phone No *	009162364879	Status	Pending
No of Users *	1	Subscription Key	

Activate Key

05

If Valid To is not defined, default 1-year license will be activated. Otherwise, depending upon the selected Valid To the validity day will be calculated and status will be as Pending.

The request will go to Sysfore Apps Team and once the license is activated, the subscription key will be sent to the customer mail. The customer can use the subscription key and activate the license.

Below screenshot explains about activation of license by using subscription key.

The screenshot shows the 'Subscription Activation' window in the Sysfore CRM MailChimp configuration tool. The window is divided into two main sections: 'Customer Details' and 'Subscription Details'. The 'Customer Details' section includes fields for First Name, Last Name, Email, Phone No, and No of Users. The 'Subscription Details' section includes fields for Valid From, Valid To, Days, Status, and Subscription Key. The 'Status' field is currently set to 'Pending'. Below the details, there is an 'Activate Key' button.

Customer Details		Subscription Details	
First Name *	Joyel	Valid From	14-Aug-2018
Last Name *	Jack	Valid To	13-Sep-2018
Email *	joyel@someone.com	Days	30
Phone No *	009162364879	Status	Pending
No of Users *	1	Subscription Key	714a0d4f9da5411c86e2305b718516e8 C73a240fed8b45019eaf973f68ebca81 997a6e6c1cc4ff1845ee830c184d8083b 81222222222222222222222222222222

After activated the license, the data will be as shown below. The status will be changed as activated. If the key is not proper or in case of any other issue, the status will be as pending only.

The screenshot shows the 'Subscription Activation' window in the Sysfore CRM MailChimp configuration tool after the license has been activated. The window is divided into two main sections: 'Customer Details' and 'Subscription Details'. The 'Customer Details' section includes fields for First Name, Last Name, Email, Phone No, and No of Users. The 'Subscription Details' section includes fields for Valid From, Valid To, Days, Status, and Subscription Key. The 'Status' field is now set to 'Activated'. Below the details, there is a 'Renewal' button.

Customer Details		Subscription Details	
First Name *	Joyel	Valid From	14-Aug-2018
Last Name *	Jack	Valid To	13-Sep-2018
Email *	joyel@someone.com	Days	30
Phone No *	009162364879	Status	Activated
No of Users *	1	Subscription Key	--

4.2.3 Renewal Activation

The customer can select the Valid From and Valid To and request for Renewal activation. The request will be pending status. The request will go to Sysfore Apps Team. The customer will get license key through mail for activating the license.

06

5. MailChimp User Definition

Immediate sync process can access by the user who is MailChimp user. MailChimp user can be defined in User entity. In user information section, "Is MailChimp User" check box has to be true if the user is MailChimp user.

Below screenshot describes the definition of MailChimp User.

The screenshot shows the Dynamics 365 User Administration interface for a user named 'Sysfore Demo'. The 'User Information' section includes fields for 'Full Name', 'Title', 'Primary Email', 'Mobile Phone', and 'Main Phone'. The 'Is MailChimp User' checkbox is checked and highlighted with a red box. The 'POSTS' section displays a list of posts, including one from 'Hari Naren' and another from 'Sales demo'.

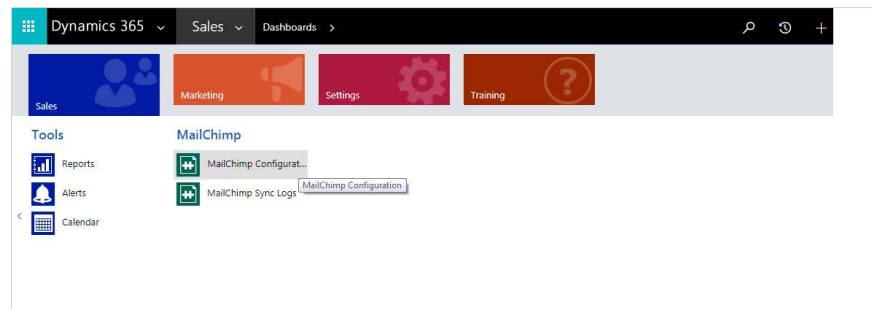

5.1 MailChimp User limit Notification

During License activation, the number of user access for sync process can be defined. More than the limit crossed the notification will be as shown as below.

The screenshot shows the Dynamics 365 User Administration interface for a user named 'Sara M.'. A 'Business Process Error' dialog box is overlaid on the page, indicating that the 'Number of MailChimp users are exceeded'. The dialog box includes a 'Download Log File' button and an 'OK' button. The background shows the 'User Information' section with the 'Is MailChimp User' checkbox checked.

6. Custom Entities

Sysfore MailChimp App contains two record types. They are MailChimp Configuration and MailChimp Sync Logs. Those are included in the Sales App.

MailChimp Configuration settings contains MailChimp credentials, account communication details and campaign details. Sync Scheduling can be started/stopped here. It explains sync starting time, next execution time and the status of sync.

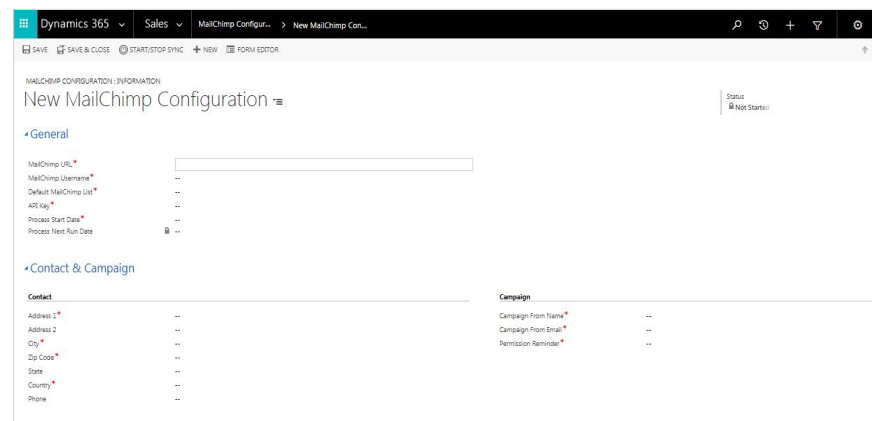

MailChimp Sync Logs describes about the status (Success/Error), sync completed time and the error log if any discontinuation happens during sync.

Response log explains about the error details. In case of success, it gives the details of the number of Contacts/Leads Created/Updated.

7. Configuration Settings

Configuration settings contains the following details.

- ▶ MailChimp account credentials
- ▶ Account address details
- ▶ Campaign details

7.1 Settings Field Explanation

MailChimp URL	: Each MailChimp account has a URL with data center. The URL has to be entered here which is used for syncing to the particular data center. For e.g., the URL should be like this. <a href="https://<datacenter>.api.mailchimp.com/3.0">https://<datacenter>.api.mailchimp.com/3.0
MailChimp Username	: Login username of Mailchimp.
Default MailChimp List	: The name of MailChimp list. Under this list only all MS D365 Contacts/Leads push to MailChimp
API Key	: MailChimp account key
Process Start Date	: The starting time of Scheduling process. This should be the current/future date and time.
Process Next Run Date	: 1 day difference between previous schedule process ran.
Contact Section	: MailChimp account communication address.
Campaign Section	: If any mail sent using the campaign, it will retrieve the name, mail and account related information from this campaign details.
Status	: Default status is Not Started. Otherwise it will be Started/Stopped.
Ribbon Button	: START/STOP SYNC is used for starting/stopping the scheduling process

7.2 Sync Start Notification

START/STOP SYNC ribbon button is used to start or stop the synchronization from MS D365 to MailChimp. The process start date should be the current / future date and time. Once started, the process will execute the time which is defined in the process start date. Each schedule process execution time, the next process execution time will be displayed in the next process run date. The scheduled time is one day between the two execution time.

8. MailChimp Sync Logs

Sync Logs describes about the status of sync (Success/Error), sync completed time and the response log details. It will register the log in every sync execution except if there are no Contacts/Leads for sync.

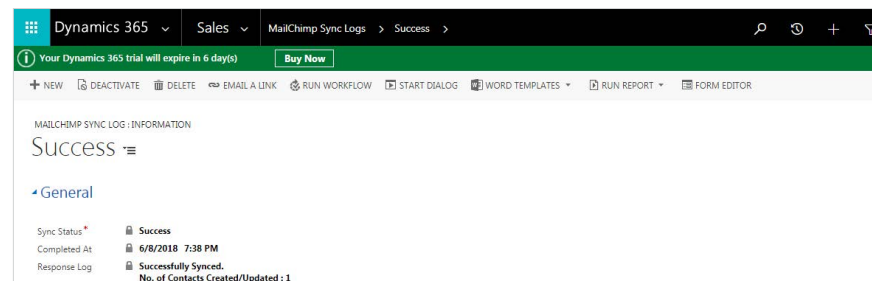

Success Sync : If one or more Contacts or Leads are synced, it should display the success message with the details of total number of contact or leads synced.

Message as follows :

Successfully Synced.

No. of Contacts Created/Updated : <Total Number of contacts>

No. of Leads Created/Updated : <Total Number of leads>

Error Sync : If MailChimp Configuration details are missing or any exception occurs during sync execution, the error log will be registered.

Plug-In Trace Log : Enable the Plug-In trace log in MS D365. It will describe the details of execution and where the sync failed.

8.1 Log Field Explanation.

Sync Status : Success/Error.

Completed at : Sync Completed Time.

Response Log : If success, the log is Successfully Synced. Otherwise, the reason for termination of sync will be recorded in the response log.

9. Contact/Lead Sync

Newly created/Updated Contact/Lead can be synced immediately or through scheduled process. The “SYNC TO MAILCHIMP” ribbon button added in Contact and Lead record is used to immediately sync to MailChimp. The field of “MailChimp Synced Status” shows the status of sync.

Each Contact and Lead synced to MailChimp as a subscriber under the MailChimp list which is defined in MailChimp Configuration settings. Name and Mail address details of every contact and lead will be synced to MailChimp list. Once contact/lead is synced the “SYNC TO MAILCHIMP” button will be hidden. If any Name and Mail modification occurs in the MS D365, the “SYNC TO MAILCHIMP” will be displayed to update the respective changes in MailChimp.

Note : Mail address is mandatory for MailChimp. The record which is not having the mail address won't sync to MailChimp.

9.1 Non Synced Contact/Lead

Newly created Contact/Lead in Dynamics 365 lead and contact entity records will be shown the status as “Non-Synced” as shown in the below screenshot.

The screenshot shows the Dynamics 365 interface for a Contact record named 'M Jack'. The 'Summary' tab is active, displaying 'CONTACT INFORMATION' on the left and 'POSTS', 'ACTIVITIES', and 'NOTES' on the right. The 'MailChimp Synced Status' field at the bottom left is highlighted in yellow and labeled 'Non-Synced'. The right sidebar shows 'RECENT CASES' and 'RECENT OPPORTUNITIES'.

9.2 Synced Contact/Lead

The status will be shown as “Synced” for all the MS D365 Contacts/Leads synced to MailChimp.

The screenshot shows the Dynamics 365 interface for a Lead record named 'Kalpana Chawla'. The 'Summary' tab is active, displaying 'CONTACT' information on the left and 'POSTS', 'ACTIVITIES', and 'NOTES' on the right. The 'MailChimp Synced Status' field at the bottom left is highlighted in green and labeled 'Synced'. The right sidebar shows 'STAKEHOLDERS'.

9.3 Modified Contacts/Leads

In case of any modifications in the name/mail of MS D365 Contacts/Leads, depending upon the changes the status will be as shown in the below screenshot.

The screenshot shows the Dynamics 365 interface for a contact named Kesava Raghav. The 'CONTACT INFORMATION' section on the left lists details like Full Name, Job Title, Account Name, Email, Business Phone, Mobile Phone, Fax, Preferred Method of Contact, and Address. The 'MailChimp Sync'd Status' is highlighted in yellow with the text 'Name Update is Pending'. The 'POSTS' section in the center shows a post titled 'Kesava Raghav' with the content 'Contact Created By Sysfore Demo.' and a timestamp of '5/31/2018 6:35 PM'. The right sidebar shows 'RECENT CASES' and 'RECENT OPPORTUNITIES' sections, both indicating 'No Case records found.'

This screenshot is similar to the one above but shows a different status for the contact. The 'MailChimp Sync'd Status' is now highlighted in yellow with the text 'Name & Mail Updates are Pending'. The rest of the contact information and the post in the center remain the same.
