# beenova

what we do

Use AI to track and measure 21st century skills to create the world's most advanced adaptive learning platform via digital channels.

Use curated content from a variety of sources to teach critical thinking, teamwork, communication, social impact, cultural awareness and other critical, future skills.

Use Phenomenon Based Learning, the world's most effective education system.

Content from publishers like:

Khan Academy   **TEDEd**   **Education.com**

Understand each student's learning DNA, based on personality testing, a daily emotional check-in and the student's interaction with the content, which is analyzed by the latest Natural Language Processing algorithms.

Deliver the right content to the right student with the right frame of mind.

How do you feel?

Add class comment

Select an emoji that reflects how you are feeling

Your answer	ASSIGNED

- 🙂 - Happy
- 😃 - Excited
- 😍 - Proud
- 😌 - Calm
- 😐 - Okay
- 😕 - Confused
- 😰 - Anxious
- ☹️ - Sad

At Beenova AI, we teach and measure 21st century skills like creativity, critical thinking and collaboration. We measure happiness to build brighter minds.

By focusing on skills that allow students to reach the highest extent of their potential, we change the future of education - equipping future leaders with skills to change their world.
