# SharePoint Documents and Lists in Confluence

The screenshot shows the Confluence interface with the page titled "SharePoint Online Connector for Confluence". The page content is divided into two main sections: "SharePoint List" and "SharePoint Document Full".

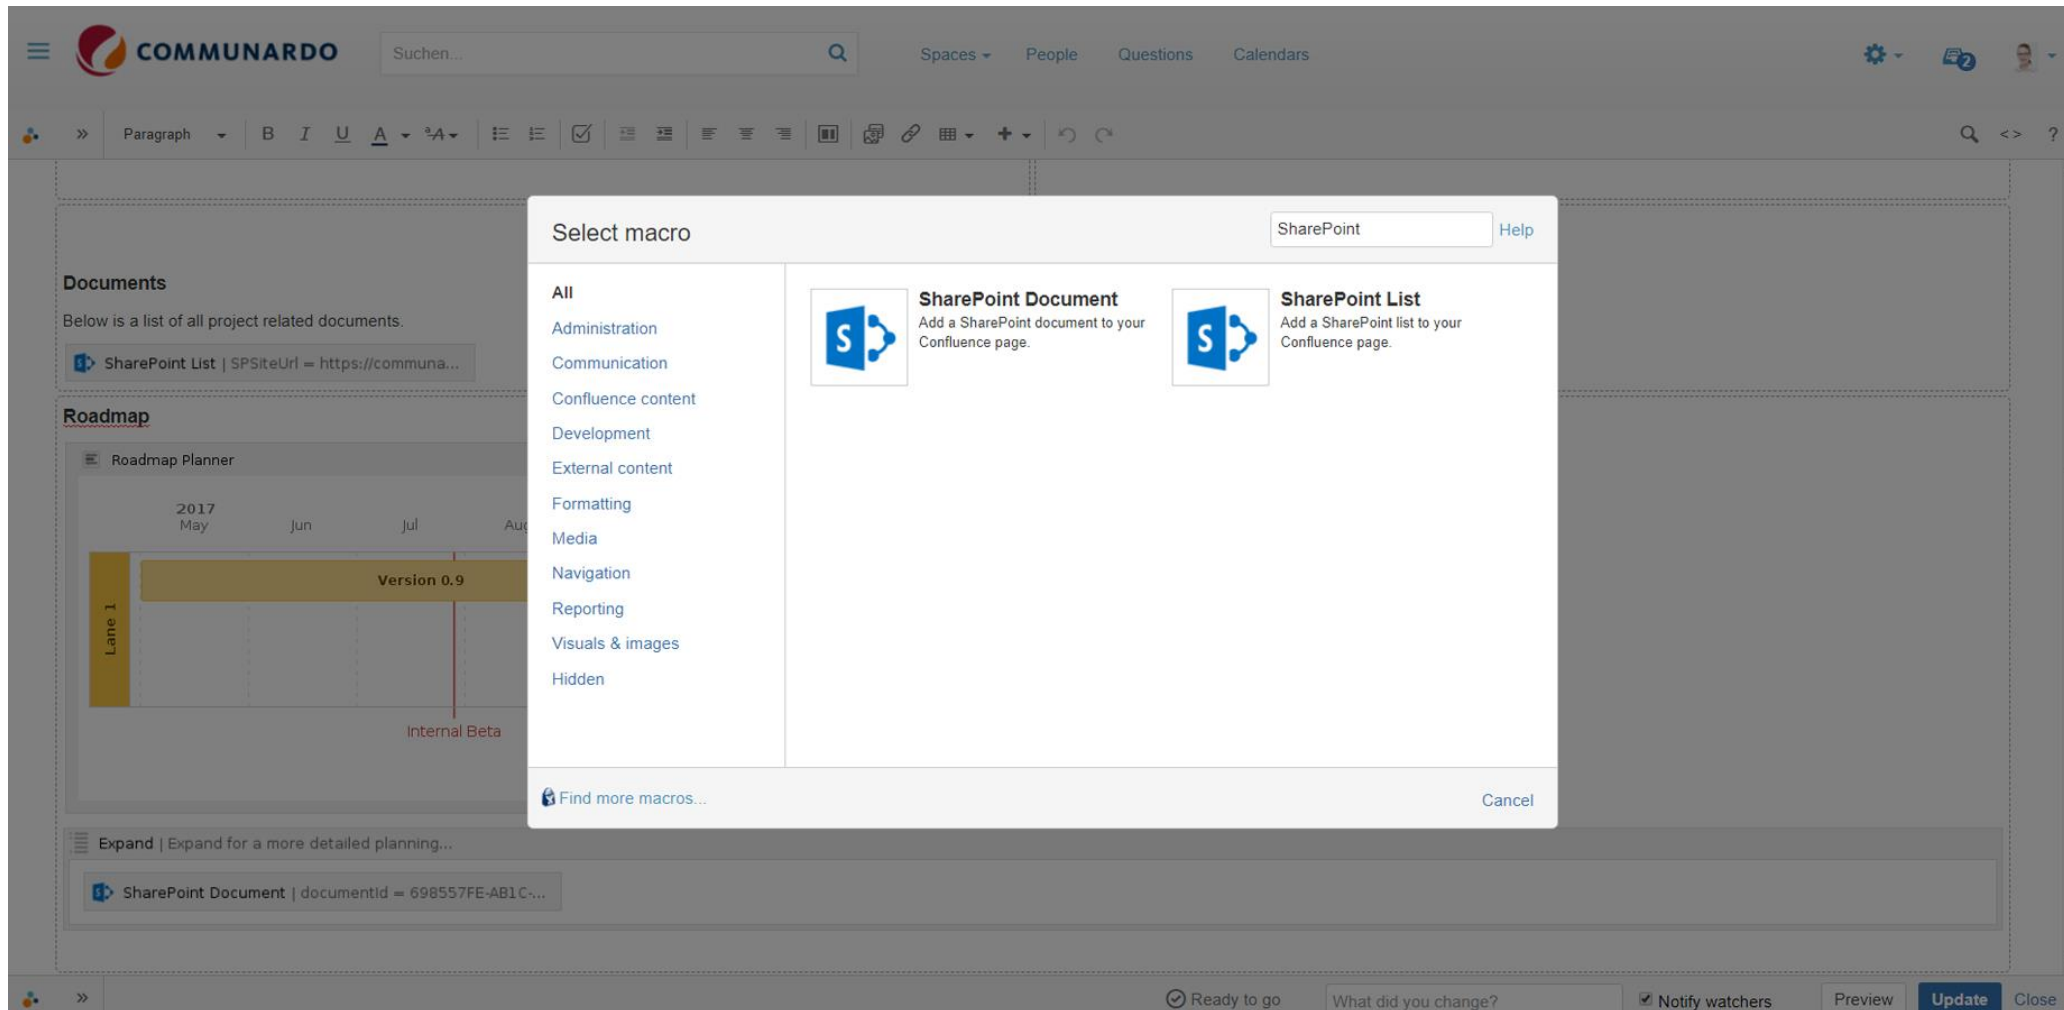

**SharePoint List:** This section displays a table of SharePoint list items. A callout bubble points to the table with the text "Embed your desired SharePoint List as a table".

**SharePoint Document Full:** This section displays a full document preview titled "SharePoint Online Connector Infos.pdf". A callout bubble points to the document with the text "Embed Documents as a link or preview".

**SharePoint Document Link:** This section displays a link to the document: "SharePoint Online Connector for Confluence.pdf".

# Add a Macro

# Embed a SharePoint Document in Confluence

The screenshot shows the Confluence interface with the 'Add a SharePoint Online Document' dialog box open. The dialog box has a title bar, a close button, and a 'Configured' section showing 'Nintex for SharePoint 2016 Brochure.pdf'. Below this are search and filter options. A table lists documents with columns for Name, Site, Last Modified By, and Modified. At the bottom, there are 'Display Options' for 'Link' and 'Full View'. Three blue circular callouts with arrows point to specific parts of the dialog: 'Sort your results according to the columns of the table' points to the table headers; 'Decide how the document should be displayed' points to the 'Full View' radio button; and 'Use all available filters to find your desired SharePoint document' points to the 'More Filters' link.

# Have your Confluence Wiki Pages in SharePoint

The screenshot shows a SharePoint Online page titled "SharePoint Online Connector for Confluence Home" created by Petrus Abaelardus. The page features a green banner with the text "Use all the functions! You able to see macros, write comments and use dialogs on this page." Below this, the "SharePoint Online Connector Features" are listed, including collaboration in the cloud, document management, and bidirectional synchronization. A "Recent space activity" section shows the page was updated 2 minutes ago. A "Space contributors" section lists Petrus Abaelardus. Callouts highlight the seamless integration of Confluence pages and the ability to read, write comments, or manage page labels.

**Use all the functions!**  
You able to see macros, write comments and use dialogs on this page.

### SharePoint Online Connector Features

- ✓ Start collaborating in the cloud: This popular app is compatible with Microsoft Office 365 and SharePoint Online
- ✓ Add robust document management capabilities to Confluence: Instantly embed, share and edit SharePoint documents in your wiki
- ✓ Never get stuck in the details: Simply embed a List or Document Library from SharePoint Online and browse the files from within a Confluence page
- ✓ Easily embed wiki pages and blog articles in SharePoint: It just takes a couple of clicks to add Confluence content into SharePoint
- ✓ Keep it all up-to-date: Bidirectional synchronization ensures that documents and content on both platforms are always in sync

## How to embed a document from SharePoint Online in a Confluence page

Created by Petrus Abaelardus a minute ago

In the first section of this Blog series I will walk you through one of the most requested features of our app SharePoint Online Connector for Confluence: displaying documents from SharePoint Online within a Confluence page or blog post! So why would one have the need to embed for that at all? Read on to find out!

Customers often tell us that Confluence is awesome for **team collaboration** but only so-so for document management (even though attachments are versioned and so on). In turn, while SharePoint offers some sort of wiki most customers only use it as better "file drive" and primarily want to benefit from all the **document management capabilities** it provides. This often leads to a situation where the gap in the integration of the two systems forms some sort of **digital divide**. But – to say it with the words of Apple Inc. – **there's an app for that!**

Now let's have a look how that would handle in real life.

The new digital divide: How competing collaboration platforms are slowing innovation  
a minute ago  
Team collaboration is often based on different platforms, which makes it hard to build a strong knowledge base for everyone in the company. Read on to get more information on breaking this cycle.

In this second section of our blog series I will walk you through another highly requested features of our app SharePoint Online Connector for Confluence: displaying List and especially Document Libraries from SharePoint Online within a Confluence page or even blog post! So why would one have the need to embed for that

How to embed a page or blog from Confluence into SharePoint Online  
3 days ago  
The (for now) final section of this blog series will cover another top feature of our app SharePoint Online Connector for Confluence: displaying content (blogs, single blog post or of course pages) from Confluence in SharePoint Online! So why would one have the need to embed for that at all? We'll find out soon!

# Modern SPFx Web Part in SharePoint

The screenshot shows a SharePoint Modern web part titled "Confluence Content". The interface includes a top bar with "Office 365" and "SharePoint" labels, a "COMMUNARDO" logo, and a user profile "Ron Thieme". A left sidebar shows navigation options like "Home", "Conversations", "Documents", "Notebook", "Pages", "Site contents", and "Recycle bin". The main content area has a "What do you want to add?" section with three options: "Page", "Blog", and "Blog Post". A "Search" button is highlighted with a callout: "Search, browse through the space or just paste in the URL of your page". Below this is a search bar containing "SharePoint Online Connector for Confluence Home". A "Settings" section at the bottom has a toggle for "Display comments" (currently "On") and a "Preview" button. A "Publish" button is visible in the top right corner. A status bar at the top right indicates "Your page has been saved".
