Solution Overview

In today's fast-paced retail environment, the need to meet and exceed customer expectations is key to staying relevant to your customer base. Being able to safely and securely accept various forms and methods of payment, as well as quickly handle transactions, returns and refunds, can make the difference between a positive and negative shopping experience.

Amicis Payments is a flexible, fully integrated payment solution that simply and securely processes and manages transactions, as well as provides comprehensive, real-time reports for businesses of any size and across a variety of industries.

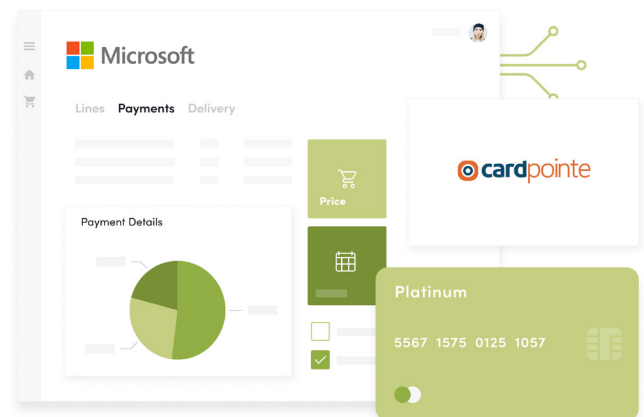

FEATURES

How it works

Available on Microsoft AppSource, Amicis JustPay works by extending the Microsoft Dynamics 365 for Finance and Operations ERP solution with point-to-point encryption (P2PE), from the point of sale to CardConnect – a First Data company – for payment processing via the CardPointe gateway.

What is CardPointe?

CardPointe is a comprehensive platform that includes a powerful reporting and transaction management portal, which extends to a native mobile app. Ultimately, Amicis JustPay helps businesses protect sensitive payment data and reduce PCI-DSS scope with the most current and forward-thinking security standards.

FEATURES

Why Amicis JustPay?

Intuitive and robust, Amicis JustPay facilitates a positive customer experience by giving users the ability to search, browse, look-up or scan products, add products to a cart, accept payment, and check out with ease and accuracy.

EMV chip-enabled payment

Accepts EMV chip-enabled payment cards and major domestic credit, debit and prepaid cards.

Virtual gateway

CardConnect serves as a gateway to virtually all major processors.

EMV card payment requirements

Meets EMV card payment receipt requirements – print required tags on card payment receipts.

CardPointe portal access

Access the CardPointe portal 24/7 for reporting tools and payment data, and perform actions like voids and refunds in real time.

Supports various devices

CardConnect BOLT P2PE supports various devices including: Ingenico iSMP4, Ingenico iSC Touch 250, Ingenico iCT220/250. For a full list, visit: Visit the full list [here](#).

PCI-compliant

Sensitive payment data is protected with P2PE, tokenization and double-encryption of credentials. Data is not stored in your system, reducing your PCI-DSS scope.

Get the most from your software investment

Our solutions grow and adapt to new business needs as your customer demands change and new selling channels emerge. Having the right software in place is just part of the equation – you must be able to rely on expertise to guide the deployment of both the technology and the right processes to support it.

At Amicis Solutions, our Professional Services team has extensive experience serving businesses in the retail and hospitality industries. We bring knowledge of industry best-practices and a wide range of consulting services to projects of any size or level of complexity, and we support our customers comprehensively, with reliability and efficiency.

Contact us today to learn how we can support your business.
