# Whirla Smart Office Optimize your hotdesking spaces

## **Friendly Workspaces**

The ability to book a desk eliminates the stress associated with the lack of an assigned work space.

## **Hot desks finally under control**

The system registers data on the desk usage and allows for tracking the hotdesk occupancy rates.

## **Higher efficiency = cost savings**

Whirla hotdesk booking system will make the most out of your flexible office.

# Whirla Smart Office Hotdesk booking system

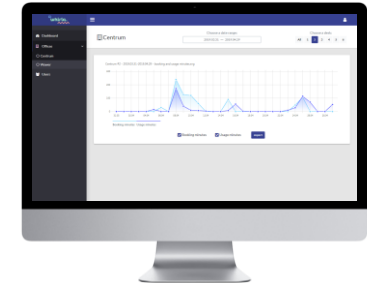

**Mobile App**

Occupancy preview and desk booking via smartphone.

**Whirla Sensors**

Sensors installed in the hotdesks.

**Admin Panel**

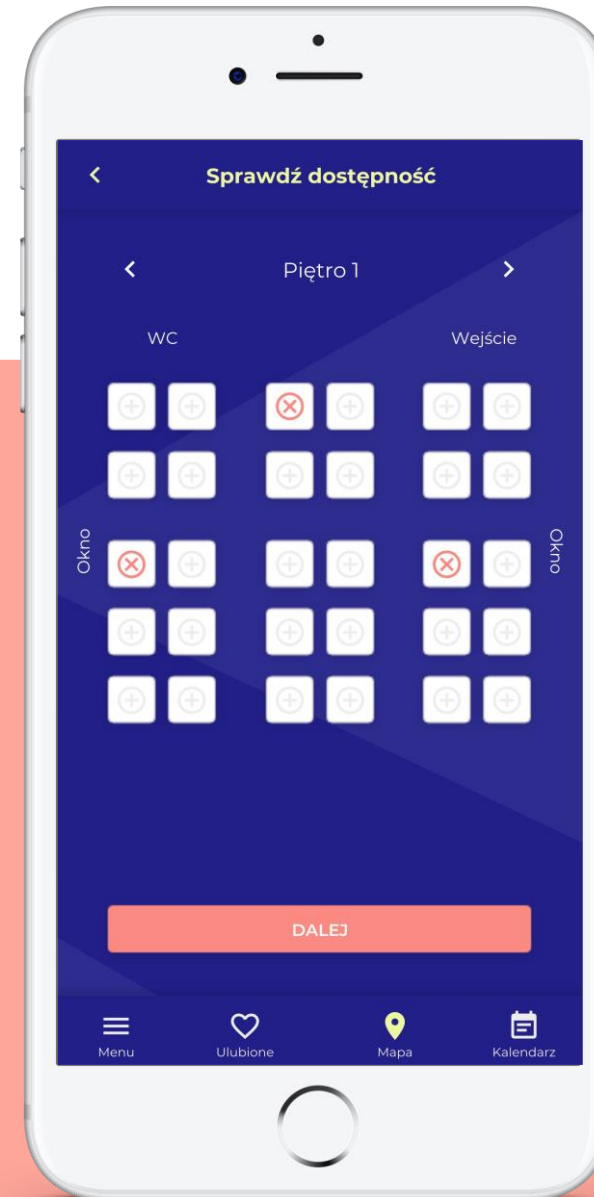

Tool for tracking and managing hotdesking spaces.

# Employee's assistant

Employees can now easily book a desk via mobile app.

With just a few clics, the user can check the hotdesk availability and get a guaranteed workspace.

All you need to manage reservations is a smartphone - add, renew and cancel reservations in the application.

# Smart desks

Whirla user recognizing sensors are designed for installation in the office desks .

To confirm a booking, simply place your smartphone on the reserved desk. No booking confirmation releases the desk and allows other users to reserve it.

Thanks to our sensors, empty reservations are eliminated.

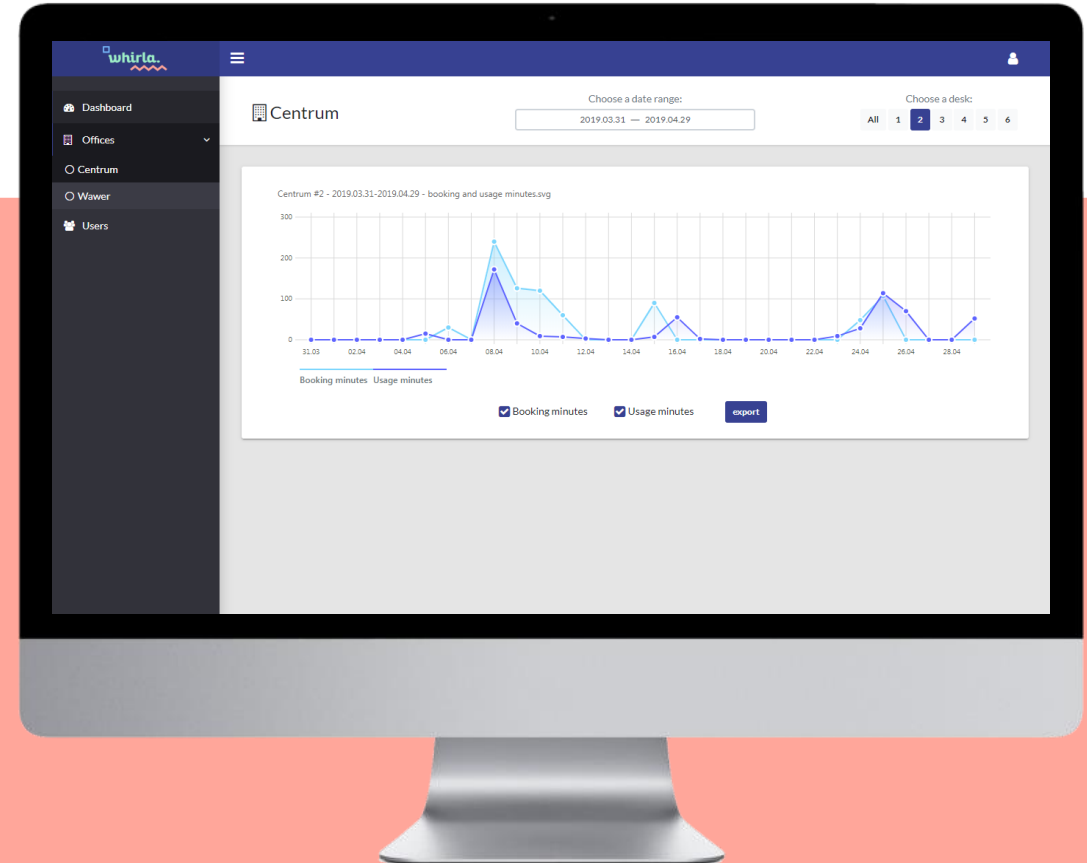

# Control your offices

The admin panel allows for adding users, dividing spaces into zones and assigning teams to desks.

The panel also includes statistics on the desk usage, peak space occupancies and user preferences.

The system analyzes the data, which eliminates time-consuming audits of the work space. With our analytics tool, it is possible to make the right decisions on office overbooking rates.

## A solution for your office

- A comfortable hotdesk spaces for your employees.
- Savings thanks to the optimization of the current office.
- Whirla Smart Office can be either a stand-alone application or part of an office or building app.
- Simple installation of Whirla sensors in any desk.
