OnePlan

Time Tracking

Centralized timesheets across all work

Unleash data-driven insights, increase productivity and bring overall awareness to what your teams are working on through OnePlan's time tracking capabilities.

Time tracking automation

Tracking time takes time and can distract from the work that's most important. Focus on getting work done and let OnePlan do the time-tracking for you.

Optimized Profitability

When time equates to profits you can't afford to miss a minute. Account for all resources, understand where your teams are spending their time and ensure its captured where it counts – billing.

Peak Performance

Leverage key insights to make data-driven decisions and track performance. Out-perform the competition by optimizing resources and ensuring business growth.

Streamlined timesheet flows

Submitting, routing and approving timesheets has never been easier. Managers can approve, reject and email timesheet updates for improved timesheet collaboration. Add notes and keep a history of timesheet updates.

Financial source of truth integrations

OnePlan

Financial data lives everywhere, but bringing it together is never easy until now. One Plan can bring in all your financial data from common financial systems including Oracle, WorkDay, QuickBooks, Dynamics 365 and more.

Flexible time categories

Create and manage multiple time categories that align with your organization's work structures. Track time at any level to ensure alignment with all your financial needs.
