

DIGITAL ADOPTION SOLUTION FOR TEAMS

LEARN HOW TO ACHIEVE MORE TOGETHER WITH MICROSOFT TEAMS

Microsoft Teams has become the solution of choice for organizations looking to drive collaboration across their enterprise and empower employees to be more productive. As the hub for collaboration in Microsoft 365, Teams transforms the way that people connect, collaborate and work. However, with any technology change the path from deployment to adoption requires a sound strategy.

How Can Organizations Get the Maximum Value out of Microsoft Teams and Microsoft 365?

Adopting Microsoft Teams means transforming the way that people collaborate, connect and share information. This means new workflows, new integrations and new ways to work together. To be successful, organizations need to manage the impact of these changes on their employees, providing communications, training and support to enable and empower them. This is where Vitalyst can help.

The Solution—Vitalyst's Digital Adoption Solution for Teams

Backed by our proprietary PROPEL Methodology™ and powered by V.A.I (Vitalyst Adoption Intelligence), our Digital Adoption Solution for Teams provides organizations with a custom solution, developed to fit their unique needs and help achieve their business goals.

All service options are delivered right in Teams and include:

Powered by Microsoft Azure Bot Services and deployed in Teams, Vitalyst Adoption Intelligence or V.A.I., provides a concierge service via a virtual agent, through which end-users are quickly connected with Vitalyst services.

Change enablement services, including a series of workshops, output plans and a communications strategy

Training programs designed to teach proper workflows and effective use of integrated tools

Deployment Design services to discover, scope and plan for piloting and full technical deployment of Teams

Employee Engagement Program for proactive end-user engagement to ensure that Teams is being adopted and utilized

Communications package to ensure end-user readiness and eliminate adoption blockers

Self-help library with hundreds of tips and tricks, updated as new functionality is released

End-user support for 24x7 live how-to assistance

Reference guides provide easy access to using top features within Teams

KEY BENEFITS

- Accelerate deployment of Teams
- Avoid disruption of business
- Reduce burden on internal support resources
- Increase active usage of Teams and Microsoft 365
- Maximize ROI on your investment in Microsoft technology
