

ShipIT

Integrate with 400+ carriers directly from within BC in the full version, or per carrier in ShipIT Light.

And click, there goes your transport order.

Directly from Microsoft Dynamics 365 Business Central to Transsmart. The easiest access to 400+ international carriers.

One simple solution to deal with all carriers worldwide

ShipIT is the easiest way to manage all your international transport orders directly from within BC. You just create your order and ShipIT does the rest. You open your ShipIT application in NAV/BC and simply select your preferred carrier for that particular order. Optionally, you can browse through rates and contracts. As soon as your transport order is set and ready, ShipIT takes over. The only thing you have to do is watch the transport unfold, and concentrate on your other, probably more important tasks.

Integrated carrier communication, via Transsmart, within BC

ShipIT is developed together with our partner Transsmart. Transsmart is one of the leading logistics data providers and focuses on streamlining communications between carriers and ERP systems. Transsmart knows about hundreds of carrier interfaces, and provides us one single endpoint to work with in BC.

Information the way you want it

ShipIT automatically 'translates' your order to the requirements of the selected carrier (booking, label printing, email notification, handling of additional documents). So both sides get the information exactly the way they want it: for you in BC, and for your counterpart through their interface.

ShipIT

Another smart Business Central extension by idyn

Carrier-connectivity to
400+carriers worldwide

Printing all transport
documents real-time

Real-time shipment
status information

A list of some key features

- Access to the Transsmart Portal from within the application, for both detailed transport orders and overview portal
- Possibility to debug background processes
- Supports BC Eventing
- ShipIT light – 1 carrier

At idyn, we specialize in developing add-ons for Microsoft Dynamics NAV. These add-ons aim at three target groups: users of Business Central, developers and our partners. ShipIT is an end-user solution. Our extensions help to make the lives of thousands of employees worldwide easier. As a result, organizations are much more productive with Business Central.

Here is what ShipIT does for your e-commerce (ShipIT + NAVcommerce)

- Offer pickup points depending on customer location
- Shipping rates based on shopping cart contents
- Track & Trace info directly available for customers
- Use track & trace and other shipment info in notifications
