

Employee Stock Sales App

DATA SEMANTICS®
BETTER INSIGHTS SMARTER DECISIONS

Employees in Retail and Hospitality Industry find it difficult to take benefits of organizational offerings, due to the lack of proper packages or discounts they can avail

DATA SEMANTICS®
BETTER INSIGHTS SMARTER DECISIONS

Challenges

Employees are unable to get discounts on their own organizational product/services in Retail & Hospitality Industry

This is leading to lack of Employee Motivation & Loyalty

As a result of lack of privileges/benefits, employees may quit the organization sooner. This leads to reduced productivity, depletion in quality of service & create a negative culture

Ideal Solution

An application that can envisage employee privileges

The application should be able to create packages, budget & apply discounts against employee ID's or hierarchy

Management finds it difficult to match discounts/budget/packages against all employees due to the size of the organization. This should be logically approached with technical expertise

Desired Outcomes

Employee Privilege solution to add value as part of employee engagement & Loyalty program

The solution will help organizations to run an employee privilege program

Globally, the solution will cater to retail & hospitality industry that has a combined manpower of over 500 million jobs

Data Semantics-Employee Stock Sales App

DATA SEMANTICS®
BETTER INSIGHTS SMARTER DECISIONS

Improve the business productivity by rewarding employees with your own services/products

Creates Packages

The management can create packages that employees can avail in the form of free or discounted holidays or goods

- Employees can pick their favorite package
- Employees can encash worth the package

Creates Budget

Employees may be offered a fixed amount of budget for the year as part of employee privileges

- Employees need to bear the extra cost on top of the budget
- Employees can even experience or avail high-value goods/services at a minimal cost

Creates Fixed Discounts

A certain percentage of discount can be allowed on each & every goods/services

- Employees can make use of the discount to experience all the offerings
- This fixed discount in the form of coupons can be gifted to the family members

Data Semantics Employee Stock Sales App acts as a value addition appliance to the human resource and business alike by improving Employee Engagement and Increased Productivity respectively

Data Semantics-Employee Privileges + PowerApps

Data Semantics Employee Privileges + PowerApps can help large retail as well as hospitality clients to develop a low code application that can be easily deployed in the enterprise technology environment without impeding the business continuity.

Solution Alignment

Lightening Speed App Creation

With the help of PowerApps the low code app can be developed easily without any major dependencies. PowerApps can build Mobile apps, apps to run on browser or even desktop apps quickly.

Uses Standard Connectors

PowerApps can easily connect with all Microsoft applications. Additionally, drag and drop selections and templates make accessing data from cloud services quick and compatible. Also, PowerApps can easily connect with many standalone data storage services.

Data Semantics Power Apps Expertise

With over 80+ PowerApps consultants and expertise in working with many Retail and Hospitality clients, Data Semantics is at the forefront of developing solutions that brings sound value to clients.
