

HITHORIZONS SCREENER

HitHorizons Screener allows you to easily search and analyze data of over 60M companies from more than 60 countries (including the whole Europe).

Analyze individual companies based on their sales and number of employees, understand particular markets and their size, get a grasp of the broader competitive landscape or pick companies you would like to collaborate with. HitHorizons Screener will provide you the data you need.

You can work with the whole database or can narrow their focus down via using 16 filters while also applying various sorting options available. Data can be downloaded to CSV and analyzed further using the software of your choice.

HitHorizons Screener will get you the data you need for your market research and sector analyses

Our **16 filtering criteria** help you to compile a list of companies relevant for your analysis: company name, industry, SIC Code, establishment of ownership, company type, location type, address, street, postal code, town, state/province, country, sales, sales accuracy indicator, number of employees, employees number accuracy indicator.

HitHorizons Screener allows you to **sort companies** based on a set of parameters (such as sales, number of employees, name, establishment of ownership or country) and create various rankings and lists.

Essential data of any company in the HitHorizons database is available in **individual company profiles**. Get additional insights via advanced analyses of companies' sectors based on location data and industry classification (region, industry, country, SIC CODE etc.) and expanded company size rankings based on sales and number of employees.

Export your list of companies and their data in CSV and analyze that data further within the software of your choice. You can **download** up to 50.000 company records in a single file. History of your data exports will be available in your HitHorizons account. Number of exports is unlimited.
